

SPYWOLF

Security Audit Report

Completed on
January 19, 2023

MADE IN USA 

 @SPYWOLFNETWORK

 @SPYWOLFNETWORK

 SPYWOLF.CO

OVERVIEW

This audit has been prepared for **Banana Banana** to review the main aspects of the project to help investors make make an informative decision during their research process.

You will find a a summarized review of the following key points:

- ✓ Contract's source code
- ✓ Owners' wallets
- ✓ Tokenomics
- ✓ Team transparency and goals
- ✓ Website's age, code, security and UX
- ✓ Whitepaper and roadmap
- ✓ Social media & online presence

“

The results of this audit are purely based on the team's evaluation and does not guarantee nor reflect the projects outcome and goal

- SPYWOLF Team -

”

Banana Banana

Banana Banana

PROJECT DESCRIPTION

According to their whitepaper:

Banana Banana is a meme token created to create user fun and happiness through its memes and fun-based utilities.

Banana Fun Token (BBFT) is inspired by funny moments, posts, jokes, and other memes on social media or other community groups based on blockchain.

Release Date: Presale starts in January 20, 2023

Category: Meme coin

CONTRACT INFO

Token Name

BANANA BANANA

Symbol

BBFT

Contract Address

0x5D7511c14f908B99f5bB000143bDa13759b55C48

Network

Binance Smart Chain

Language

Solidity

Deployment Date

Dec-11-2022

Verified?

Yes

Total Supply

100,000,000

Status

Not launched

TAXES

Buy Tax
none

Sell Tax
3%

*Taxes can be changed in future

Our Contract Review Process

The contract review process pays special attention to the following:

- ✓ Testing the smart contracts against both common and uncommon vulnerabilities
- ✓ Assessing the codebase to ensure compliance with current best practices and industry standards.
- ✓ Ensuring contract logic meets the specifications and intentions of the client.
- ✓ Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders.
- ✓ Thorough line-by-line manual review of the entire codebase by industry experts.

Blockchain security tools used:

- OpenZeppelin
- Mythril
- Solidity Compiler
- Hardhat

CURRENT STATS

(As of January 19, 2022)

Liquidity

Not added yet

Burn

No burnt tokens

Status:
Not Launched!

MaxSellTxAmount
1,000,000

DEX
PancakeSwap

LP Address(es)

Liquidity not added yet

TOKEN TRANSFERS STATS

Transfer Count	15
Uniq Senders	2
Uniq Receivers	9
Total Amount	199687099.99999997 BBFT
Median Transfer Amount	9000000 BBFT
Average Transfer Amount	13312473.333333332 BBFT
First transfer date	2022-12-11
Last transfer date	2023-01-19
Days token transferred	6

SMART CONTRACT STATS

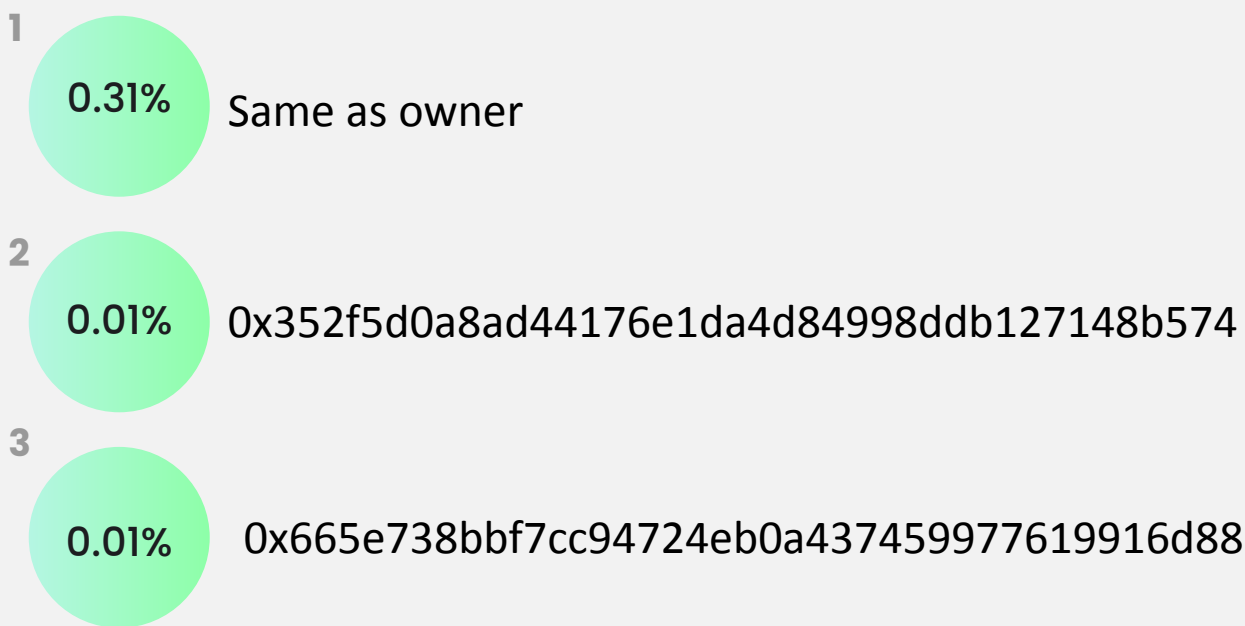

Calls Count	27
External calls	2
Internal calls	25
Transactions count	10
Uniq Callers	3
Days contract called	1
Last transaction time	2023-01-19 05:06:59 UTC
Created	2023-01-19 03:54:34 UTC
Create TX	0xf1fe368a0eb5d2214acaecel7d75c9fce89eb75fe71d0acee376567c23977374
Creator	0xe3efc5ad5cbcb7214ac5ab92fe7344344191f246

FEATURED WALLETS

Owner address	0xe3efc5ad5cbcb7214ac5ab92fe7344344191f246
Marketing wallet	0xb5ac796774a6a362b37ba82405b246d5867707a3
LP address	Liquidity not added yet

TOP 3 UNLOCKED WALLETS

VULNERABILITY CHECK

Design Logic	Passed
Compiler warnings.	Passed
Private user data leaks	Passed
Timestamp dependence	Passed
Integer overflow and underflow	Passed
Race conditions and reentrancy. Cross-function race conditions	Passed
Possible delays in data delivery	Passed
Oracle calls	Passed
Front running	Passed
DoS with Revert	Passed
DoS with block gas limit	Passed
Methods execution permissions	Passed
Economy model	Passed
Impact of the exchange rate on the logic	Passed
Malicious Event log	Passed
Scoping and declarations	Passed
Uninitialized storage pointers	Passed
Arithmetic accuracy	Passed
Cross-function race conditions	Passed
Safe Zeppelin module	Passed
Fallback function security	Passed

THREAT LEVELS

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time. We categorize these vulnerabilities by the following levels:

High Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Medium Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Low Risk

Issues on this level are minor details and warning that can remain unfixed.

Informational

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

FOUND THREATS

High Risk

No high risk-level threats found in this contract.

Medium Risk

No medium risk-level threats found in this contract.

Low Risk

No low risk-level threats found in this contract.

Informational

Owner can exclude address from fees.

```
function excludeFromFee(address account) public onlyOwner {  
    _isExcludedFromFee[account] = true;  
}
```

Owner can set cooldown between trades up to 255 seconds.

```
function updateCooldown(bool state, uint8 time) external onlyOwner {  
    coolDownTime = time * 1 seconds;  
    coolDownEnabled = state;  
}
```

Owner can withdraw any tokens from the contract.

```
function rescueBNB(uint256 weiAmount) external onlyOwner {  
    require(address(this).balance >= weiAmount, "insufficient BNB balance");  
    payable(msg.sender).transfer(weiAmount);  
}  
  
function rescueAnyBEP20Tokens(  
    address _tokenAddr,  
    address _to,  
    uint256 _amount  
) public onlyOwner {  
    IERC20(_tokenAddr).transfer(_to, _amount);  
}
```

RECOMMENDATIONS FOR

GOOD PRACTICES

1

Consider fundamental tradeoffs

2

Be attentive to blockchain properties

3

Ensure careful rollouts

4

Keep contracts simple

5

Stay up to date and track development

BANANA BANANA

GOOD PRACTICES FOUND

- ✓ The owner cannot mint new tokens after deployment
- ✓ The owner cannot pause or stop the contract
- ✓ The owner cannot set a transaction limit after deployment

Initial tokens distribution according to Pinksale's presale page:

- 22% - Presale
- 10.7% - Liquidity
- 18% - CEX (Bitmart)
- 9% - Team vesting
- 10% - Staking DAPP
- 20% - BBFT Web3 DAPP
- 10% - BBFT NFT

Tokens distribution

Contract Development

ABOUT US

We are a growing crypto security agency offering audits, KYCs and consulting services for some of the top names in the crypto industry.

- ✓ OVER 150 SUCCESSFUL CLIENTS
- ✓ MORE THAN 500 SCAMS EXPOSED
- ✓ MILLIONS SAVED IN POTENTIAL FRAUD
- ✓ PARTNERSHIPS WITH TOP LAUNCHPADS, INFLUENCERS AND CRYPTO PROJECTS
- ✓ CONSTANTLY BUILDING TOOLS TO HELP INVESTORS DO BETTER RESEARCH

Disclaimer

This report shows findings based on our limited project analysis, following good industry practice from the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, overall social media and website presence and team transparency details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report.

While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

DISCLAIMER:

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice.

No one shall have any right to rely on the report or its contents, and SpyWolf and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (SpyWolf) owe no duty of care towards you or any other person, nor does SpyWolf make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and SpyWolf hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, SpyWolf hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against SpyWolf, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts, website, social media and team.

No applications were reviewed for security. No product code has been reviewed.
