# THREAT LEVELS

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time. We categorize these vulnerabilities by the following levels:

## High Risk

---

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

## Medium Risk

---

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

## Low Risk

---

Issues on this level are minor details and warning that can remain unfixed.

## Informational

---

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

# FOUND THREATS

## ⚠ High Risk

Owner can set buy/sell fees up to 100%.

```
function setBUSDRewardsFeeBuy(uint256 val) external onlyOwner {
    BUSDRewardsFeeBuy = val;
}
function setDevFeeBuy(uint256 val) external onlyOwner {
    DevFeeBuy = val;
}
function setMarketingFeeBuy(uint256 val) external onlyOwner {
    MarketingFeeBuy = val;
}
function setBUSDRewardsFeesSell(uint256 val) external onlyOwner {
    BUSDRewardsFeeSell = val;
}
function setDevFeeSell(uint256 val) external onlyOwner {
    DevFeeSell = val;
}
function setMarketingFeeSell(uint256 val) external onlyOwner {
    MarketingFeeSell = val;
}
function setBurnFee(uint256 val) external onlyOwner {
    BurnFee = val;
}
```

- Recommendation:
  - Considered as good tax deduction practice is buy and sell fees combined not to exceed 25%

# FOUND THREATS

## ⚠ High Risk

Owner can change max sell transaction, making it impossible to sell if set to 0.

```
function SetmaxSellTransactionAmount(uint256 maxSellTransactionAmount)
    external
    onlyOwner
{
    _maxSellTransactionAmount = maxSellTransactionAmount;
}
```

- Recommendation:
  - Considered as good transaction limitations practice is that max amount transferred per transaction not be below 0.1% of total supply.

# FOUND THREATS

## ⚠ High Risk

Owner can change contract's auto swap settings.

Once accumulated tokens from fees reach `_swapTokensAtAmount`'s value, selling fails.

If `_swapTokensAtAmount` value is set below contract's accumulated tokens from fees, selling fails.

When `BUSDRewardsFeeSell` is set to 0, trading fails no matter what is the value of `_swapTokensAtAmount`.

```
function setswapTokensAtAmount(uint256 swapTokensAtAmount)
    external
    onlyOwner
{
    _swapTokensAtAmount = swapTokensAtAmount;
}

function setBUSDRewardsFeesSell(uint256 val) external onlyOwner {
    BUSDRewardsFeeSell = val;
}
```

RECOMMENDATIONS FOR

# GOOD PRACTICES

Consider fundamental tradeoffs

2

Be attentive to blockchain properties

3

Ensure careful rollouts

4

Keep contracts simple

5

Stay up to date and track development

## Yggdrasil Finance
