

SPYWOLF

Security Audit Report

Completed on
March 25, 2023

OVERVIEW

This audit has been prepared for **CRAPYBARA** to review the main aspects of the project to help investors make an informative decision during their research process.

You will find a summarized review of the following key points:

- ✓ Contract's source code
- ✓ Owners' wallets
- ✓ Tokenomics
- ✓ Team transparency and goals
- ✓ Website's age, code, security and UX
- ✓ Whitepaper and roadmap
- ✓ Social media & online presence

“

The results of this audit are purely based on the team's evaluation and does not guarantee nor reflect the projects outcome and goal

- SPYWOLF Team -

”

CRAPYBARA

PROJECT DESCRIPTION

According to their website:

Welcome to the herd, dear Crapybaras. We are the next top meme coin and - to be honest - that is our only goal. Many of us missed the big memes like Doge, Shiba Inu or Floki.

If you analyze the social media platforms, crapybaras are increasing in popularity and they are super cute.

Release Date: Launched at March 24, 2023

Category: Meme token

CONTRACT INFO

Token Name
Crapybara

Symbol
CRAPY

Contract Address
0x6B56Cd70DC946c819dA01CF59aec978EA6D05b88

Network
Binance Smart Chain

Language
Solidity

Deployment Date
March 24, 2023

Verified?
Yes

Total Supply
10,000,000

Status
Launched

TAXES

Buy Tax
5%

Sell Tax
5%

*Fees can be changed in future

Our Contract Review Process

The contract review process pays special attention to the following:

- ✓ Testing the smart contracts against both common and uncommon vulnerabilities
- ✓ Assessing the codebase to ensure compliance with current best practices and industry standards.
- ✓ Ensuring contract logic meets the specifications and intentions of the client.
- ✓ Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders.
- ✓ Thorough line-by-line manual review of the entire codebase by industry experts.

Blockchain security tools used:

- OpenZeppelin
- Mythril
- Solidity Compiler
- Hardhat

TOKEN TRANSFERS STATS

Transfer Count	727
Uniq Senders	77
Uniq Receivers	160
Total Amount	44503960.32562313 CRAPY
Median Transfer Amount	5185.865645527535 CRAPY
Average Transfer Amount	61215.901410760845 CRAPY
First transfer date	2023-03-24
Last transfer date	2023-03-25
Days token transferred	2

SMART CONTRACT STATS

Calls Count	1355
External calls	107
Internal calls	1248
Transactions count	431
Uniq Callers	111
Days contract called	2
Last transaction time	2023-03-25 16:46:40 UTC
Created	2023-03-24 22:43:55 UTC
Create TX	0xac19df78d90ac5ac909fa2de14f6a8969d981e2359b55354a004fe186080632f
Creator	0x3571bf5be1ca66c7c54f4b51806bfe6fd4a4fa7c

VULNERABILITY CHECK

Design Logic	Passed
Compiler warnings.	Passed
Private user data leaks	Passed
Timestamp dependence	Passed
Integer overflow and underflow	Passed
Race conditions and reentrancy. Cross-function race conditions	Passed
Possible delays in data delivery	Passed
Oracle calls	Passed
Front running	Passed
DoS with Revert	Passed
DoS with block gas limit	Passed
Methods execution permissions	Passed
Economy model	Passed
Impact of the exchange rate on the logic	Passed
Malicious Event log	Passed
Scoping and declarations	Passed
Uninitialized storage pointers	Passed
Arithmetic accuracy	Passed
Cross-function race conditions	Passed
Safe Zeppelin module	Passed
Fallback function security	Passed

THREAT LEVELS

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time. We categorize these vulnerabilities by the following levels:

High Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Medium Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Low Risk

Issues on this level are minor details and warning that can remain unfixed.

Informational

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

FOUND THREATS

High Risk

No high risk-level threats found in this contract.

Medium Risk

No medium risk-level threats found in this contract.

Low Risk

No low risk-level threats found in this contract.

Informational

Owner can exclude address from fees.

When address is excluded from fees, it will receive the whole amount of the bought, sold and/or transferred tokens.

```
function excludeFromFees(address account, bool excluded)
    external
    onlyOwner
{
    require(
        _isExcludedFromFees[account] != excluded,
        "Account is already the value of 'excluded'"
    );
    _isExcludedFromFees[account] = excluded;

    emit ExcludeFromFees(account, excluded);
}
```

Owner can set buy/sell fees up to 5%.

Combined buy+sell=10%.

When fees are above 0, there will be certain amount of tokens that will be deducted from every transaction that users make.

Deducted amount will be as much as the fees % from total amount that user had bought, sold and/or transferred.

```
function setFees(uint256 _feeOnBuy, uint256 _feeOnSell) external onlyOwner {
    require(
        _feeOnBuy <= 5,
        "Marketing fee on buy cannot be more than 5%"
    );
    require(
        _feeOnSell <= 5,
        "Marketing fee on sell cannot be more than 5%"
    );
    feeOnBuy = _feeOnBuy;
    feeOnSell = _feeOnSell;
    emit FeesUpdated(feeOnBuy, feeOnSell);
}
```

RECOMMENDATIONS FOR

GOOD PRACTICES

1

Consider fundamental tradeoffs

2

Be attentive to blockchain properties

3

Ensure careful rollouts

4

Keep contracts simple

5

Stay up to date and track development

CRAPYBARA

GOOD PRACTICES FOUND

- ✓ The owner cannot mint new tokens after deployment
- ✓ The owner cannot stop or pause the contract
- ✓ The owner cannot set a transaction limit

Current tokens distribution according to BSCScan.

- 14.4% - Liquidity pair*
- 9.5% - Burnt
- 15.4% - Top 5 holders
- 60.7% - Rest of the holders

Tokens distribution

*100% of the liquidity tokens are burnt.
This means that they are no longer accessible to anyone.

THE TEAM

! The team is anonymous

KYC INFORMATION

! No KYC

We recommend the team to get a KYC in order to ensure trust and transparency within the community.

Disclaimer

This report shows findings based on our limited project analysis, following good industry practice from the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, overall social media and website presence and team transparency details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report.

While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

DISCLAIMER:

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice.

No one shall have any right to rely on the report or its contents, and SpyWolf and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (SpyWolf) owe no duty of care towards you or any other person, nor does SpyWolf make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and SpyWolf hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, SpyWolf hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against SpyWolf, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts, website, social media and team.

No applications were reviewed for security. No product code has been reviewed.
