

SPYWOLF

Security Audit Report

Completed on
September 11, 2023

@SPYWOLFNETWORK

@SPYWOLFNETWORK

SPYWOLF.CO

OVERVIEW

This audit has been prepared for **PropelCrypto** to review the main aspects of the project to help investors make an informative decision during their research process.

You will find a summarized review of the following key points:

- ✓ Contract's source code
- ✓ Owners' wallets
- ✓ Tokenomics
- ✓ Team transparency and goals
- ✓ Website's age, code, security and UX
- ✓ Whitepaper and roadmap
- ✓ Social media & online presence

“

The results of this audit are purely based on the team's evaluation and does not guarantee nor reflect the projects outcome and goal

- SPYWOLF Team -

”

PropelCrypto

PROJECT DESCRIPTION

According to their whitepaper:

PropelCrypto (PCR) is an ERC20 token based on the Ethereum blockchain with a total supply of 1 quadrillion.

Its purpose is to serve as Entrepreneurs' Token in Africa, enabling them to hold, own, trade for profit and become the engine of empowering financially a Free Tuition Business School for 100% Entrepreneurship.

Release Date: Presale starts in September, 2023

Category: DeFi

CONTRACT INFO

Token Name PropelCrypto	Symbol PCR
Contract Address 0x264Cf2798c7Df1c86E5fe8164FE24aC7532bF624	
Network Ethereum	Language Solidity
Deployment Date Sep 24, 2020	Contract Type Standard token
Total Supply 1,000,000,000,000,000	Status Not launched

TAXES

Our Contract Review Process

The contract review process pays special attention to the following:

- ✓ Testing the smart contracts against both common and uncommon vulnerabilities
- ✓ Assessing the codebase to ensure compliance with current best practices and industry standards.
- ✓ Ensuring contract logic meets the specifications and intentions of the client.
- ✓ Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders.
- ✓ Thorough line-by-line manual review of the entire codebase by industry experts.

Blockchain security tools used:

- OpenZeppelin
- Mythril
- Solidity Compiler
- Hardhat

TOKEN TRANSFERS STATS

Transfer Count	164
Uniq Senders	7
Uniq Receivers	42
Total Amount	1000000206247995.6 PCR
Median Transfer Amount	1500 PCR
Average Transfer Amount	6097562233219.485 PCR
First transfer date	2020-09-24
Last transfer date	2023-09-10
Days token transferred	54

SMART CONTRACT STATS

Calls Count	5
External calls	1
Internal calls	4
Transactions count	2
Uniq Callers	3
Days contract called	2
Last transaction time	2023-09-10 06:03:59 UTC
Created	2023-09-09 12:34:47 UTC
Create TX	0xed5b856b86028340b70bc1c641fc423673043c6bd237f29aebf8d4fb37b03125
Creator	0xf91c4558dd42b4cdE671577dAbf202296a57c1AE

VULNERABILITY CHECK

Design Logic	Passed
Compiler warnings.	Passed
Private user data leaks	Passed
Timestamp dependence	Passed
Integer overflow and underflow	Passed
Race conditions and reentrancy. Cross-function race conditions	Passed
Possible delays in data delivery	Passed
Oracle calls	Passed
Front running	Passed
DoS with Revert	Passed
DoS with block gas limit	Passed
Methods execution permissions	Passed
Economy model	Passed
Impact of the exchange rate on the logic	Passed
Malicious Event log	Passed
Scoping and declarations	Passed
Uninitialized storage pointers	Passed
Arithmetic accuracy	Passed
Cross-function race conditions	Passed
Safe Zeppelin module	Passed
Fallback function security	Passed

THREAT LEVELS

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time. We categorize these vulnerabilities by the following levels:

High Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Medium Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Low Risk

Issues on this level are minor details and warning that can remain unfixed.

Informational

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

FOUND THREATS

High Risk

No high risk-level threats found in this contract.

Medium Risk

No medium risk-level threats found in this contract.

Low Risk

No low risk-level threats found in this contract.

Informational

Owner can only enable transfers.
Transfers are currently enabled.

```
modifier canTransfer(address from) {  
    require(  
        _transferEnabled || hasRole(OPERATOR_ROLE, from),  
        "ERC20Base: transfer is not enabled or from does not have the OPERATOR role"  
    );  
    _;  
}  
  
function enableTransfer() public onlyOwner {  
    _transferEnabled = true;  
  
    emit TransferEnabled();  
}  
  
function transfer(address to, uint256 value) public virtual  
override(ERC20) canTransfer(_msgSender()) returns (bool) {  
    return super.transfer(to, value);  
}  
  
function transferFrom(address from, address to, uint256 value) public virtual  
override(ERC20) canTransfer(from) returns (bool) {  
    return super.transferFrom(from, to, value);  
}
```

Informational

Initially owner could mint tokens, when the `_mintingFinished` is enabled. `_mintingFinished` is currently disabled and can't be enabled again.

```
function mint(address to, uint256 value) public canMint onlyMinter {
    _mint(to, value);
}

modifier canMint() {
    require(!_mintingFinished, "ERC20Base: minting is finished");
    _;
}

function finishMinting() public canMint onlyOwner {
    _mintingFinished = true;

    emit MintFinished();
}

function mintingFinished() public view returns (bool) {
    return _mintingFinished;
}
```

Owner can withdraw any tokens from the contract, except ETH. When this function is present, in cases tokens sent into the contract by mistake or purposefully, contract's owner can retrieve them.

```
function recoverERC20(address tokenAddress, uint256 tokenAmount) public onlyOwner {
    IERC20(tokenAddress).transfer(owner(), tokenAmount);
}
```

RECOMMENDATIONS FOR

GOOD PRACTICES

1

Consider fundamental tradeoffs

2

Be attentive to blockchain properties

3

Ensure careful rollouts

4

Keep contracts simple

5

Stay up to date and track development

PropelCrypto

GOOD PRACTICES FOUND

- ✓ The owner cannot mint new tokens after deployment
- ✓ The owner cannot stop or pause the contract
- ✓ The owner cannot set a transaction limit
- ✓ The smart contract utilizes "SafeMath" to prevent overflows

There is no information about the initial tokens distribution based on the project's whitepaper and/or website.

TOKENOMICS

THE TEAM

The team has privately doxxed to FusionTech

WEBSITE

Website URL

<https://propelcrypto.online/>

Domain Registry

<https://www.godaddy.com>

Domain Expiration

2024-03-14

Technical SEO Test

Passed

Security Test

Passed. SSL certificate present

Design

Single page design with appropriate color scheme and graphics.

Content

The information helps new investors understand what the product does right away. No grammar mistakes found.

Whitepaper

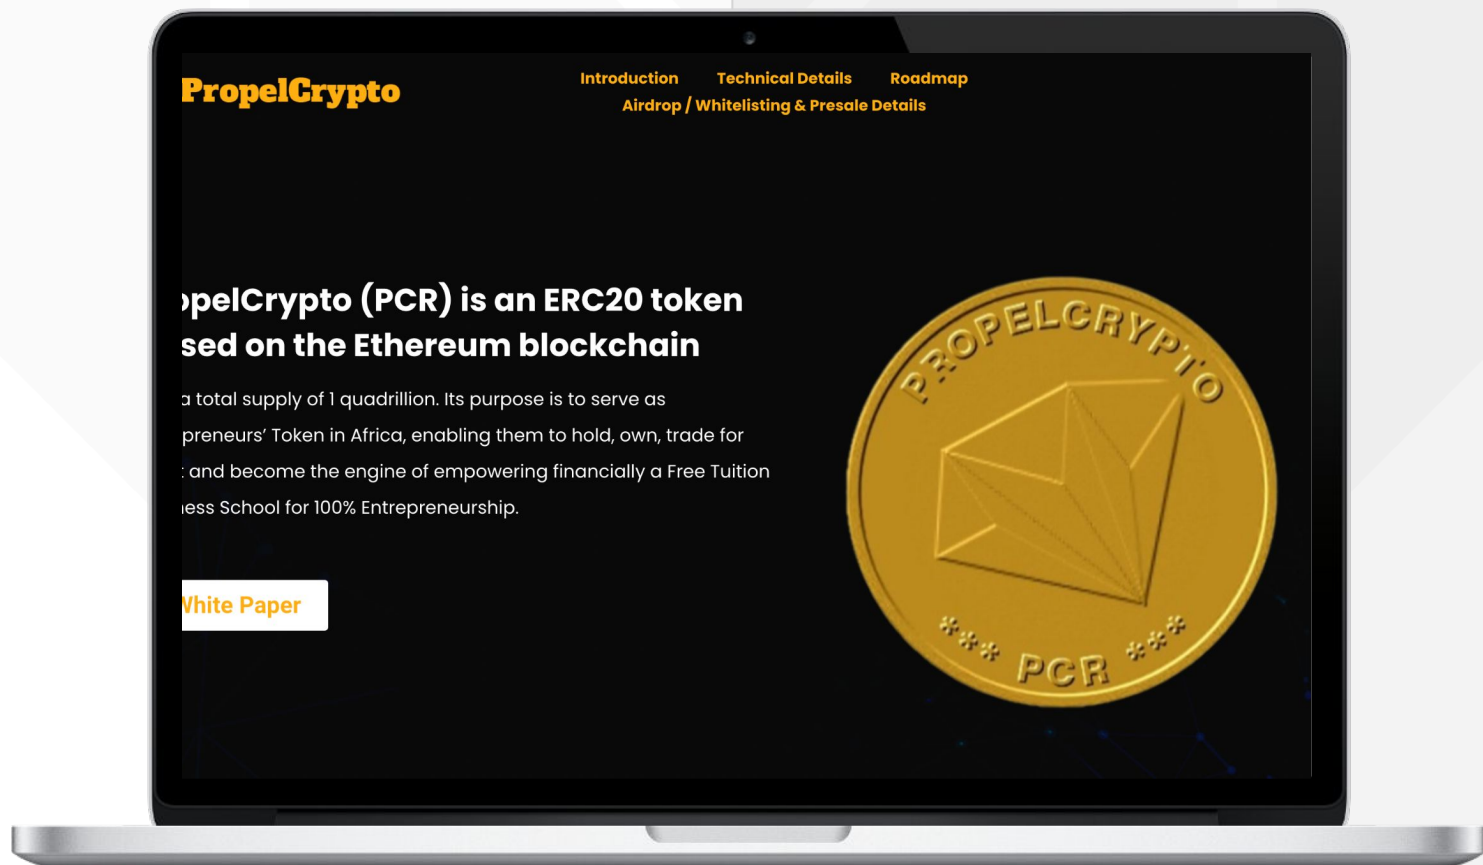

Well written, explanatory.

Roadmap

Yes, goals set with time frames.

Mobile-friendly?

Yes

CRYPTO SECURITY

Audits | KYCs | dApps
Contract Development

ABOUT US

We are a growing crypto security agency offering audits, KYCs and consulting services for some of the top names in the crypto industry.

- ✓ OVER 500 SUCCESSFUL CLIENTS
- ✓ MORE THAN 500 SCAMS EXPOSED
- ✓ MILLIONS SAVED IN POTENTIAL FRAUD
- ✓ PARTNERSHIPS WITH TOP LAUNCHPADS, INFLUENCERS AND CRYPTO PROJECTS
- ✓ CONSTANTLY BUILDING TOOLS TO HELP INVESTORS DO BETTER RESEARCH

Disclaimer

This report shows findings based on our limited project analysis, following good industry practice from the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, overall social media and website presence and team transparency details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report.

While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

DISCLAIMER:

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice.

No one shall have any right to rely on the report or its contents, and SpyWolf and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (SpyWolf) owe no duty of care towards you or any other person, nor does SpyWolf make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and SpyWolf hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, SpyWolf hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against SpyWolf, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts, website, social media and team.

No applications were reviewed for security. No product code has been reviewed.
