## Security Audit Report

Completed on  
**November 18, 2022**

MADE IN USA 

@SPYWOLFNETWORK

@SPYWOLFNETWORK

SPYWOLF.CO

# OVERVIEW

This audit has been prepared for **MeijiDAO** to review the main aspects of the project to help investors make an informative decision during their research process.

You will find a summarized review of the following key points:

- ✓ Contract's source code
- ✓ Owners' wallets
- ✓ Tokenomics
- ✓ Team transparency and goals
- ✓ Website's age, code, security and UX
- ✓ Whitepaper and roadmap
- ✓ Social media & online presence

“

*The results of this audit are purely based on the team's evaluation and does not guarantee nor reflect the projects outcome and goal*

- SPYWOLF Team -

”

# TABLE OF CONTENTS

---

Project Description	01
Contract Information	02
Current Stats	03-04
Featured Wallets	05

Disclaimer	15

# MeijiDAO

## PROJECT DESCRIPTION

### **According to their whitepaper:**

MeijiDAO will be launchpad for degen meme tokens. The project will include decentralized incubator, farms, pools and staking.

MeijiDAO will have a unique tier system consisting of 9 different tier levels allowing both small and large token holders access to the most sought after presales.

The higher tier level user hold the more allocation he will receive when it comes to the presales hosted on MeijiDAO's platform.

**Release Date:** Presale starts in November 22, 2022

**Category:** Launchpad

# CONTRACT INFO

Token Name

MeijiDAO

Symbol

MEIJI

Contract Address

0x03d7fdA755a1ED534F808F81d5524032B28167ef

Network

Binance Smart Chain

Language

Solidity

Deployment Date

July 25, 2022

Verified?

Yes

Total Supply

100,000,000

Status

Not launched

## TAXES

Buy Tax  
**none**

Sell Tax  
**none**

\*Taxes cannot be changed

## Our Contract Review Process

The contract review process pays special attention to the following:

- ✓ Testing the smart contracts against both common and uncommon vulnerabilities
- ✓ Assessing the codebase to ensure compliance with current best practices and industry standards.
- ✓ Ensuring contract logic meets the specifications and intentions of the client.
- ✓ Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders.
- ✓ Thorough line-by-line manual review of the entire codebase by industry experts.

### Blockchain security tools used:

- OpenZeppelin
- Mythril
- Solidity Compiler
- Hardhat

# CURRENT STATS

(As of November 17, 2022)

Liquidity

Not added yet

Burn

No burnt tokens

Status:  
**Not Launched!**

MaxTxAmount  
No Limit

DEX:  
PancakeSwap

LP Address(es)

Liquidity not added yet

## TOKEN TRANSFERS STATS

Transfer Count	19
Uniq Senders	6
Uniq Receivers	14
Total Amount	497109887 MEIJI
Median Transfer Amount	7000000 MEIJI
Average Transfer Amount	26163678 MEIJI
First transfer date	2022-07-25
Last transfer date	2022-11-15
Days token transferred	7

## SMART CONTRACT STATS

Calls Count	8
External calls	4
Internal calls	4
Transactions count	5
Uniq Callers	2
Days contract called	1
Last transaction time	2022-11-15 18:12:49 UTC
Created	2022-11-15 16:28:33 UTC
Create TX	0xdea32c81dcb7e118507345b428bd6d0808ba5a12f3cc0a5f74631ecdde1bb91c
Creator	0x96e7d4eec9b54123cb7b07ad7c1840005af0fd20

# FEATURED WALLETS

Owner address	0x96e7d4eec9b54123cb7b07ad7c1840005af0fd20
LP address	Liquidity not added yet

## TOP 3 UNLOCKED WALLETS

# VULNERABILITY CHECK

Design Logic	Passed
Compiler warnings.	Passed
Private user data leaks	Passed
Timestamp dependence	Passed
Integer overflow and underflow	Passed
Race conditions and reentrancy. Cross-function race conditions	Passed
Possible delays in data delivery	Passed
Oracle calls	Passed
Front running	Passed
DoS with Revert	Passed
DoS with block gas limit	Passed
Methods execution permissions	Passed
Economy model	Passed
Impact of the exchange rate on the logic	Passed
Malicious Event log	Passed
Scoping and declarations	Passed
Uninitialized storage pointers	Passed
Arithmetic accuracy	Passed
Cross-function race conditions	Passed
Safe Zeppelin module	Passed
Fallback function security	Passed

# THREAT LEVELS

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time. We categorize these vulnerabilities by the following levels:

## High Risk

---

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

## Medium Risk

---

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

## Low Risk

---

Issues on this level are minor details and warning that can remain unfixed.

## Informational

---

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

# FOUND THREATS

## ⚠ High Risk

Owner can mint (create) new tokens.  
This can lead in token's price inflation and liquidity drain.

```
function mint(address _address, uint256 _amount) public onlyOwner {  
    _mint(_address, _amount);  
}
```

- Recommendation:
  - Considered as good practice is token's mint to happen only once in the initial contract deployment.

# FOUND THREATS

## ⚠ Low Risk

Owner can enable Pinksale's anti snipe blacklist.

```
function setEnableAntiBot(bool _enable) external onlyOwner {
    antiBotEnabled = _enable;
}

function _transfer(
    address from,
    address to,
    uint256 amount
) internal virtual {
    require(from != address(0), "ERC20: transfer from the zero address");
    require(to != address(0), "ERC20: transfer to the zero address");

    if (antiBotEnabled) {
        pinkAntiBot.onPreTransferCheck(from, to, amount);
    }
    .....
}
```

RECOMMENDATIONS FOR

# GOOD PRACTICES

---

- 1 Consider fundamental tradeoffs
- 2 Be attentive to blockchain properties
- 3 Ensure careful rollouts
- 4 Keep contracts simple
- 5 Stay up to date and track development

## PROJECT NAME

### GOOD PRACTICES FOUND

- ✓ The owner cannot stop or pause the contract
- ✓ The owner cannot set a transaction limit

\*The following tokenomics are based on Pinksale's presale page:

- 30% - Presale
- 30% - Burnt
- 14% - Liquidity
- 13% - Locked
- 13% - Unlocked

# ABOUT US

We are a growing crypto security agency offering audits, KYCs and consulting services for some of the top names in the crypto industry.

- ✓ OVER 150 SUCCESSFUL CLIENTS
- ✓ MORE THAN 500 SCAMS EXPOSED
- ✓ MILLIONS SAVED IN POTENTIAL FRAUD
- ✓ PARTNERSHIPS WITH TOP LAUNCHPADS, INFLUENCERS AND CRYPTO PROJECTS
- ✓ CONSTANTLY BUILDING TOOLS TO HELP INVESTORS DO BETTER RESEARCH

# Disclaimer

This report shows findings based on our limited project analysis, following good industry practice from the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, overall social media and website presence and team transparency details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report.

While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

## **DISCLAIMER:**

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice.

No one shall have any right to rely on the report or its contents, and SpyWolf and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (SpyWolf) owe no duty of care towards you or any other person, nor does SpyWolf make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and SpyWolf hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, SpyWolf hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against SpyWolf, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts, website, social media and team.

No applications were reviewed for security. No product code has been reviewed.
