

SPYWOLF

Security Audit Report

Completed on
August 31, 2022

MADE IN USA 

@SPYWOLFNETWORK

@SPYWOLFNETWORK

SPYWOLF.CO

OVERVIEW

This audit has been prepared for **Jackpot Chihuahua** to review the main aspects of the project to help investors make an informative decision during their research process.

You will find a summarized review of the following key points:

- ✓ Contract's source code
- ✓ Owners' wallets
- ✓ Tokenomics
- ✓ Team transparency and goals
- ✓ Website's age, code, security and UX
- ✓ Whitepaper and roadmap
- ✓ Social media & online presence

“

The results of this audit are purely based on the team's evaluation and does not guarantee nor reflect the projects outcome and goal

- SPYWOLF Team -

”

Jackpot Chihuahua

PROJECT DESCRIPTION

According to their website:

"We are creating a unique JACKPOT called the beloved CZ ChiHuaHua pet. Here, you will encounter the uniqueness of the working mechanism and unlimited jackpots, with a chance to win the jackpot every 3 days. We will charge high commissions for buying and selling tokens, so that there will be a temptation for people to buy and not sell every day, increasing the bonus pool. The commission is 15% for buys and 15% for sells. All funds will go directly to the jackpot pool."

Release Date: Presale starts on August, 2022

Category: Gamble

CONTRACT INFO

Token Name

Jackpot chihuahua

Symbol

JPC

Contract Address

0xf7eedfBbDF63Fe6567c7cle9659c0De6fA5CD687

Network

Binance Smart Chain
TESTNET

Language

Solidity

Deployment Date

August 31, 2022

Verified?

Yes

Total Supply

1,000,000,000

Status

Not launched

TAXES

Buy Tax
7%

Sell Tax
15%

*Taxes can be changed in future

Our Contract Review Process

The contract review process pays special attention to the following:

- ✓ Testing the smart contracts against both common and uncommon vulnerabilities
- ✓ Assessing the codebase to ensure compliance with current best practices and industry standards.
- ✓ Ensuring contract logic meets the specifications and intentions of the client.
- ✓ Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders.
- ✓ Thorough line-by-line manual review of the entire codebase by industry experts.

Blockchain security tools used:

- OpenZeppelin
- Mythril
- Solidity Compiler
- Hardhat

CURRENT STATS

(As of August 31, 2022)

Liquidity

Not added yet

Jackpot3	0xc5eadba5efeaab0154a293afcba0c11df386658f
Jackpot4	0xb1d21ceda28627f066c7408b9cb7c58ced0c42c8
LP address	Liquidity not added yet

TOP 3 UNLOCKED WALLETS

VULNERABILITY CHECK

Design Logic	Passed
Compiler warnings.	Passed
Private user data leaks	Passed
Timestamp dependence	Passed
Integer overflow and underflow	Passed
Race conditions and reentrancy. Cross-function race conditions	Passed
Possible delays in data delivery	Passed
Oracle calls	Passed
Front running	Passed
DoS with Revert	Passed
DoS with block gas limit	Passed
Methods execution permissions	Passed
Economy model	Passed
Impact of the exchange rate on the logic	Passed
Malicious Event log	Passed
Scoping and declarations	Passed
Uninitialized storage pointers	Passed
Arithmetic accuracy	Passed
Cross-function race conditions	Passed
Safe Zeppelin module	Passed
Fallback function security	Passed

THREAT LEVELS

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time. We categorize these vulnerabilities by the following levels:

High Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Medium Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Low Risk

Issues on this level are minor details and warning that can remain unfixed.

Informational

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

Informational

Owner can change buy fees up to 7% and sell fees up to 15%.
Combined buy+sell=23%.

```
function setNewBuyTaxes(uint256 _buyJackpotFee) public onlyOwner {
    _setBuyTax(_buyJackpotFee);
}

function _setBuyTax(uint256 _buyTax) internal {
    require(_buyTax <= 70, "More than 7%");
    buyJackpotFee = _buyTax;
}

function setNewSellTaxes(
    uint256 _jackpot1Fee,
    uint256 _jackpot2Fee,
    uint256 _jackpot3Fee
) public onlyOwner {
    _setSellTax(_jackpot1Fee, _jackpot2Fee, _jackpot3Fee);
}

function _setSellTax(
    uint256 _jackpot1,
    uint256 _jackpot2,
    uint256 _jackpot3
) internal {
    require(_jackpot1 >= 0 && _jackpot1 <= 50, "devs fee must be from 0 to 5%");
    require(_jackpot2 >= 0 && _jackpot2 <= 50, "marketing fee must be from 0 to 5%");
    require(_jackpot3 >= 0 && _jackpot3 <= 50, "reward fee must be from 0 to 5%");
    sellJackpot1Fee = _jackpot1;
    sellJackpot2Fee = _jackpot2;
    sellJackpot3Fee = _jackpot3;
}
```

Informational

Owner can exclude address from fees.

```
function excludeFromFee(address account) public onlyOwner {  
    _excludeFromFee(account);  
}  
  
function _excludeFromFee(address account) internal {  
    _isExcludedFromFee[account] = true;  
}
```

Owner can withdraw any tokens from the contract.

```
function withdrawERC20(address tokenAddress) public onlyOwner {  
    uint256 amount = IERC20(tokenAddress).balanceOf(address(this));  
    require(amount > 0, "no tokens on contract");  
    IERC20(tokenAddress).transfer(_msgSender(), amount);  
}
```

RECOMMENDATIONS FOR

GOOD PRACTICES

1

Consider fundamental tradeoffs

2

Be attentive to blockchain properties

3

Ensure careful rollouts

4

Keep contracts simple

5

Stay up to date and track development

Jackpot Chihuahua

GOOD PRACTICES FOUND

- ✓ The owner cannot mint new tokens after deployment
- ✓ The owner cannot stop or pause the contract
- ✓ The owner cannot set a transaction limit

⚠ There is no information about initial tokens distribution in project's website and/or social media pages.

TOKENOMICS

THE TEAM

! The team is
anonymous

KYC INFORMATION

! No KYC

We recommend the team to get a KYC in order to ensure trust and transparency within the community.

Disclaimer

This report shows findings based on our limited project analysis, following good industry practice from the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, overall social media and website presence and team transparency details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report.

While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

DISCLAIMER:

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice.

No one shall have any right to rely on the report or its contents, and SpyWolf and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (SpyWolf) owe no duty of care towards you or any other person, nor does SpyWolf make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and SpyWolf hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, SpyWolf hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against SpyWolf, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts, website, social media and team.

No applications were reviewed for security. No product code has been reviewed.
