## Security Audit Report

Completed on  
**August 15, 2023**

@SPYWOLFNETWORK

@SPYWOLFNETWORK

SPYWOLF.CO

# OVERVIEW

This audit has been prepared for **EVOLUTION TECHNOLOGIES** to review the main aspects of the project to help investors make an informative decision during their research process.

You will find a summarized review of the following key points:

- ✓ Contract's source code
- ✓ Owners' wallets
- ✓ Tokenomics
- ✓ Team transparency and goals
- ✓ Website's age, code, security and UX
- ✓ Whitepaper and roadmap
- ✓ Social media & online presence

“

*The results of this audit are purely based on the team's evaluation and does not guarantee nor reflect the projects outcome and goal*

”

- SPYWOLF Team -

# TABLE OF CONTENTS

---

Project Description	01
Contract Information	02
Current Stats	03
Vulnerability Check	04
Threat Levels	05
Found Threats	06-A/06-C
Good Practices	07
Tokenomics	08
Team Information	09
Website Analysis	10
Social Media & Online Presence	11

Disclaimer	13

# EVOLUTION TECHNOLOGIES

## PROJECT DESCRIPTION

### **According to the project's website:**

“Welcome to the world of Evolution Technologies, where innovation meets blockchain to redefine the landscape of cryptocurrency. Our comprehensive ecosystem encompasses the Evo token, Evo Wallet, and Evo Bridge, delivering a seamless experience for cryptocurrency enthusiasts and investors alike.”

**Release Date:** Presale starts in August, 2023

**Category:** DeFi

# CONTRACT INFO

Token Name  
EVOLUTION

Symbol  
EVO

Contract Address  
0xdE0D004CA76CEaa3820fDF6C270693cD101f61C4

Network  
Binance Smart Chain

Language  
Solidity

Deployment Date  
Aug 12, 2023

Verified?  
Yes

Total Supply  
100,000,000,000

Status  
Not Launched

## TAXES

Buy Tax  
**5%**

Sell Tax  
**5%**

\*Taxes cannot be changed

## Our Contract Review Process

The contract review process pays special attention to the following:

- ✓ Testing the smart contracts against both common and uncommon vulnerabilities
- ✓ Assessing the codebase to ensure compliance with current best practices and industry standards.
- ✓ Ensuring contract logic meets the specifications and intentions of the client.
- ✓ Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders.
- ✓ Thorough line-by-line manual review of the entire codebase by industry experts.

### Blockchain security tools used:

- OpenZeppelin
- Mythril
- Solidity Compiler
- Hardhat

# TOKEN TRANSFERS STATS

Transfer Count	1
Uniq Senders	1
Uniq Receivers	1
Total Amount	100000000000 EVO
Median Transfer Amount	100000000000 EVO
Average Transfer Amount	100000000000 EVO
First transfer date	2023-08-12
Last transfer date	2023-08-12
Days token transferred	1

# SMART CONTRACT STATS

Calls Count	3
External calls	3
Internal calls	0
Transactions count	3
Uniq Callers	1
Days contract called	1
Last transaction time	2023-08-12 17:43:23 UTC
Created	2023-08-12 17:33:08 UTC
Create TX	0xbe66ab1ae4031e79211da1ce7fb6aaee890c bf337274e74226c25968f482ca4b
Creator	0x4e355e12862538a2727196335cdeb5c900b bclD8

# VULNERABILITY CHECK

Design Logic	Passed
Compiler warnings.	Passed
Private user data leaks	Passed
Timestamp dependence	Passed
Integer overflow and underflow	Passed
Race conditions and reentrancy. Cross-function race conditions	Passed
Possible delays in data delivery	Passed
Oracle calls	Passed
Front running	Passed
DoS with Revert	Passed
DoS with block gas limit	Passed
Methods execution permissions	Passed
Economy model	Passed
Impact of the exchange rate on the logic	Passed
Malicious Event log	Passed
Scoping and declarations	Passed
Uninitialized storage pointers	Passed
Arithmetic accuracy	Passed
Cross-function race conditions	Passed
Safe Zeppelin module	Passed
Fallback function security	Passed

# THREAT LEVELS

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time. We categorize these vulnerabilities by the following levels:

## High Risk

---

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

## Medium Risk

---

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

## Low Risk

---

Issues on this level are minor details and warning that can remain unfixed.

## Informational

---

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

# FOUND THREATS

## ⚠ Medium Risk

**Owner can change contract's auto swap settings.**

If swapEnabled is true and swapTokensAtAmount is set to 0 and contract's token balances are 0, contract will halt and selling will fail.

```
function updateSwapTokensAtAmount(uint256 amount) external onlyOwner {
    require(amount <= 42e14, "Can't set swap threshold amount higher than 1% of tokens.");
    swapTokensAtAmount = amount * 10**_decimals;
}

function updateSwapEnabled(bool _enabled) external onlyOwner {
    swapEnabled = _enabled;
}

function _transfer(
    address from,
    address to,
    uint256 amount
) private {
    .....
    bool canSwap = balanceOf(address(this)) >= swapTokensAtAmount;
    if (
        !swapping &&
        swapEnabled &&
        canSwap &&
        from != pair &&
        !_isExcludedFromFee[from] &&
        !_isExcludedFromFee[to]
    ) {
        if (to == pair) swapAndLiquify(swapTokensAtAmount, sellTaxes);
        else swapAndLiquify(swapTokensAtAmount, taxes);
    }
    .....
}
```

- Recommendation:
  - Ensure that swapTokensAtAmount's value is always above 1 token (consider decimals).

## Informational

### **Owner can withdraw BNB from the contract.**

When this function is present, in cases ETH tokens are sent into the contract by mistake or purposefully, contract's owner can retrieve them.

```
function rescueBNB(uint256 weiAmount) external onlyOwner {  
    require(address(this).balance >= weiAmount, "Insufficient BNB balance.");  
    payable(msg.sender).transfer(weiAmount);  
}
```

### **Owner can withdraw any tokens from the contract except the native \$EVO token.**

When this function is present, in cases tokens sent into the contract by mistake or purposefully, contract's owner can retrieve them.

```
function rescueAnyBEP20Tokens(address _tokenAddr, address _to, uint256 _amount) public onlyOwner {  
    require(_tokenAddr != address(this), "Owner can't claim contract's balance of its own tokens.");  
    IBEP20(_tokenAddr).transfer(_to, _amount);  
}
```

### **Owner can enable trading once and cannot disable it.**

Trading is currently enabled.

```
function EnableTrading() external onlyOwner {  
    require(!tradingEnabled, "Cannot re-enable trading.");  
    tradingEnabled = true;  
    swapEnabled = true;  
    genesis_block = block.number;  
}
```

## Informational

### **Owner can exclude address from fees.**

When address is excluded from fees, the user will receive the whole amount of the bought, sold and/or transferred tokens.

```
function excludeFromFee(address account) public onlyOwner {
    _isExcludedFromFee[account] = true;
}

function bulkExcludeFee(address[] memory accounts, bool state) external onlyOwner {
    for (uint256 i = 0; i < accounts.length; i++) {
        _isExcludedFromFee[accounts[i]] = state;
    }
}
```

### **Owner can exclude address from rewards.**

```
function excludeFromReward(address account) public onlyOwner {
    require(!_isExcluded[account], "Account is already excluded.");
    if (_rOwned[account] > 0) {
        _tOwned[account] = tokenFromReflection(_rOwned[account]);
    }
    _isExcluded[account] = true;
    _excluded.push(account);
}
```

RECOMMENDATIONS FOR

# GOOD PRACTICES

---

1

Consider fundamental tradeoffs

2

Be attentive to blockchain properties

3

Ensure careful rollouts

4

Keep contracts simple

5

Stay up to date and track development

## EVOLUTION TECHNOLOGIES

### GOOD PRACTICES FOUND

- ✓ The owner cannot mint new tokens after deployment
- ✓ The owner cannot stop or pause the contract
- ✓ The owner cannot set transaction limit

The following tokens distribution is based on the project's whitepaper and/or website:

- 23% - Liquidity
- 46% - Public sale
- 15% - Exchange listing
- 15% - Bridge/Treasury

### Tokens distribution

# THE TEAM

⚠ The team is  
anonymous

## KYC INFORMATION

### No KYC

We recommend the team to get a KYC in order to ensure trust and transparency within the community.

# WEBSITE

## Website URL

<https://evolutionary.tech/>

## Domain Registry

<https://www.hostinger.com/>

## Domain Expiration

2024-08-13

## Technical SEO Test

Passed

## Security Test

Passed. SSL certificate present

## Design

Single page design with appropriate color scheme and graphics.

## Content

Content is explanatory and helps investors to understand what the product does right away.

## Whitepaper

Yes, explanatory.

## Roadmap

Yes. Goals set with no specific dates.

## Mobile-friendly?

Yes

Contract Development

# ABOUT US

We are a growing crypto security agency offering audits, KYCs and consulting services for some of the top names in the crypto industry.

- ✓ OVER 500 SUCCESSFUL CLIENTS
- ✓ MORE THAN 500 SCAMS EXPOSED
- ✓ MILLIONS SAVED IN POTENTIAL FRAUD
- ✓ PARTNERSHIPS WITH TOP LAUNCHPADS, INFLUENCERS AND CRYPTO PROJECTS
- ✓ CONSTANTLY BUILDING TOOLS TO HELP INVESTORS DO BETTER RESEARCH

# Disclaimer

This report shows findings based on our limited project analysis, following good industry practice from the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, overall social media and website presence and team transparency details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report.

While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

## **DISCLAIMER:**

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice.

No one shall have any right to rely on the report or its contents, and SpyWolf and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (SpyWolf) owe no duty of care towards you or any other person, nor does SpyWolf make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and SpyWolf hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, SpyWolf hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against SpyWolf, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts, website, social media and team.

No applications were reviewed for security. No product code has been reviewed.
