

SPYWOLF

Security Audit Report

Completed on
May 27, 2023

@SPYWOLFNETWORK

@SPYWOLFNETWORK

SPYWOLF.CO

OVERVIEW

This audit has been prepared for **BLUE BIRD PEPE** to review the main aspects of the project to help investors make make an informative decision during their research process.

You will find a a summarized review of the following key points:

- ✓ Contract's source code
- ✓ Owners' wallets
- ✓ Tokenomics
- ✓ Team transparency and goals
- ✓ Website's age, code, security and UX
- ✓ Whitepaper and roadmap
- ✓ Social media & online presence

“

The results of this audit are purely based on the team's evaluation and does not guarantee nor reflect the projects outcome and goal

- SPYWOLF Team -

”

BLUE BIRD PEPE

trending

BBPEPE

PROJECT DESCRIPTION

According to their whitepaper:

Blue Bird Pepe (BBPEPE) represents the fusion of the legendary Pepe meme and the symbol of free speech and fun on Twitter. However, BBPEPE is not just another memecoin; it incorporates utility within the meme itself. With a team of experienced individuals, BBPEPE aims to achieve the seemingly impossible.

Release Date: Presale starts in May, 2023

Category: Meme token

CONTRACT INFO

Token Name
BLUE BIRD PEPE

Symbol
BBPEPE

Contract Address
0x091d471d8410cb14451a45F406922f271E356283

Network
Binance Smart Chain

Language
Solidity

Deployment Date
May 22, 2023

Verified?
Yes

Total Supply
387,213,929,113,000

Status
Not launched

TAXES

Buy Tax
7%

Sell Tax
5%

Our Contract Review Process

The contract review process pays special attention to the following:

- ✓ Testing the smart contracts against both common and uncommon vulnerabilities
- ✓ Assessing the codebase to ensure compliance with current best practices and industry standards.
- ✓ Ensuring contract logic meets the specifications and intentions of the client.
- ✓ Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders.
- ✓ Thorough line-by-line manual review of the entire codebase by industry experts.

Blockchain security tools used:

- OpenZeppelin
- Mythril
- Solidity Compiler
- Hardhat

TOKEN TRANSFERS STATS

Transfer Count	9
Uniq Senders	2
Uniq Receivers	9
Total Amount	8333661999999999.9 BBPEPE
Median Transfer Amount	8413000000000 BBPEPE
Average Transfer Amount	92596244444444.42 BBPEPE
First transfer date	2023-05-22
Last transfer date	2023-05-25
Days token transferred	2

SMART CONTRACT STATS

Calls Count	13
External calls	9
Internal calls	4
Transactions count	10
Uniq Callers	2
Days contract called	2
Last transaction time	2023-05-25 12:33:29 UTC
Created	2023-05-22 08:17:06 UTC
Create TX	0xa2332f504c71703a2e1ebd3887f4e32ca0489a445041f8f155354ebe7980c961
Creator	0x678a0a7b147c810fcd08b2ca4e6a1ldb46c0fb2b

VULNERABILITY CHECK

Design Logic	Passed
Compiler warnings.	Passed
Private user data leaks	Passed
Timestamp dependence	Passed
Integer overflow and underflow	Passed
Race conditions and reentrancy. Cross-function race conditions	Passed
Possible delays in data delivery	Passed
Oracle calls	Passed
Front running	Passed
DoS with Revert	Passed
DoS with block gas limit	Passed
Methods execution permissions	Passed
Economy model	Passed
Impact of the exchange rate on the logic	Passed
Malicious Event log	Passed
Scoping and declarations	Passed
Uninitialized storage pointers	Passed
Arithmetic accuracy	Passed
Cross-function race conditions	Passed
Safe Zeppelin module	Passed
Fallback function security	Passed

THREAT LEVELS

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time. We categorize these vulnerabilities by the following levels:

High Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Medium Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Low Risk

Issues on this level are minor details and warning that can remain unfixed.

Informational

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

FOUND THREATS

⚠ High Risk

Owner can blacklist address, making it impossible to sell.
If liquidity pair is blacklisted, selling will fail for all users.

```
function blacklist(address _address, bool _isBlacklisting) external onlyOwner {
    blacklists[_address] = _isBlacklisting;
}

function _transfer(
    address sender,
    address recipient,
    uint256 amount
) internal virtual {
    .....
    _beforeTokenTransfer(sender, recipient, amount);
    .....
}

function _beforeTokenTransfer(
    address from,
    address to,
    uint256 amount
) override internal virtual {
    require(!blacklists[to] && !blacklists[from], "Blacklisted");
    .....
}
```

- Recommendation:
 - Blacklisting addresses for bot protection purposes should be automated. Liquidity pair should be always excluded from such practices.

FOUND THREATS

⚠ High Risk

Owner can enable/disable trading.

When `uniswapV2Pair` is set at `address(0)`, this can be considered for disable trading as it effectively block transfers if the caller is not the owner.

```
function setRule(bool _limited, address _uniswapV2Pair,
uint256 _maxHoldingAmount, uint256 _minHoldingAmount) external onlyOwner {
    limited = _limited;
    uniswapV2Pair = _uniswapV2Pair;
    maxHoldingAmount = _maxHoldingAmount;
    minHoldingAmount = _minHoldingAmount;
}

function _transfer(
    address sender,
    address recipient,
    uint256 amount
) internal virtual {
    .....
    _beforeTokenTransfer(sender, recipient, amount);
    .....
}

function _beforeTokenTransfer(
    address from,
    address to,
    uint256 amount
) override internal virtual {
    require(!blacklists[to] && !blacklists[from], "Blacklisted");

    if (uniswapV2Pair == address(0)) {
        require(from == owner() || to == owner(), "trading is not started");
        return;
    }
    .....
}
```

- Recommendation:
 - Once enabled, trading should not be disabled again.

FOUND THREATS

Informational

Owner can set min buy limit, and max wallet limit without limitations.
If max wallet limit is set to 0, users won't be able to buy.
If buy limit is set to big number, only big amounts can be bought.

```
function setRule(bool _limited, address _uniswapV2Pair,
uint256 _maxHoldingAmount, uint256 _minHoldingAmount) external onlyOwner {
    limited = _limited;
    uniswapV2Pair = _uniswapV2Pair;
    maxHoldingAmount = _maxHoldingAmount;
    minHoldingAmount = _minHoldingAmount;
}

function _transfer(
    address sender,
    address recipient,
    uint256 amount
) internal virtual {
    .....
    _beforeTokenTransfer(sender, recipient, amount);
    .....
}

function _beforeTokenTransfer(
    address from,
    address to,
    uint256 amount
) override internal virtual {
    .....
    if (limited && from == uniswapV2Pair) {
        require(super.balanceOf(to) + amount <= maxHoldingAmount &&
            super.balanceOf(to) + amount >= minHoldingAmount, "Forbid");
    }
}
```

RECOMMENDATIONS FOR

GOOD PRACTICES

1

Consider fundamental tradeoffs

2

Be attentive to blockchain properties

3

Ensure careful rollouts

4

Keep contracts simple

5

Stay up to date and track development

BLUR BIRD PEPE

GOOD PRACTICES FOUND

- ✓ The owner cannot mint new tokens after deployment

The following tokenomics are based on the project's whitepaper and/or website:

- 81.1% - Presale & Liquidity
- 2% - Marketing
- 6.9% - Ecosystem
- 2% - Airdrop
- 8% - Burn

Tokens distribution

TOKENOMICS

THE TEAM

! The team is anonymous

KYC INFORMATION

! No KYC

We recommend the team to get a KYC in order to ensure trust and transparency within the community.

WEBSITE

Website URL

ABOUT US

We are a growing crypto security agency offering audits, KYCs and consulting services for some of the top names in the crypto industry.

- ✓ OVER 500 SUCCESSFUL CLIENTS
- ✓ MORE THAN 500 SCAMS EXPOSED
- ✓ MILLIONS SAVED IN POTENTIAL FRAUD
- ✓ PARTNERSHIPS WITH TOP LAUNCHPADS, INFLUENCERS AND CRYPTO PROJECTS
- ✓ CONSTANTLY BUILDING TOOLS TO HELP INVESTORS DO BETTER RESEARCH

Disclaimer

This report shows findings based on our limited project analysis, following good industry practice from the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, overall social media and website presence and team transparency details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report.

While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

DISCLAIMER:

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice.

No one shall have any right to rely on the report or its contents, and SpyWolf and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (SpyWolf) owe no duty of care towards you or any other person, nor does SpyWolf make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and SpyWolf hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, SpyWolf hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against SpyWolf, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts, website, social media and team.

No applications were reviewed for security. No product code has been reviewed.
