

# SPYWOLF

## Security Audit Report

Completed on  
**December 7, 2023**

@SPYWOLFNETWORK

@SPYWOLFNETWORK

SPYWOLF.CO

# OVERVIEW

This audit has been prepared for **PRAYGE** to review the main aspects of the project to help investors make an informative decision during their research process.

You will find a summarized review of the following key points:

- ✓ Contract's source code
- ✓ Owners' wallets
- ✓ Tokenomics
- ✓ Team transparency and goals
- ✓ Website's age, code, security and UX
- ✓ Whitepaper and roadmap
- ✓ Social media & online presence

“

*The results of this audit are purely based on the team's evaluation and does not guarantee nor reflect the projects outcome and goal*

– SPYWOLF Team –

”

# TABLE OF CONTENTS

---

Project Description	01
Contract Information	02
Current Stats	03
Vulnerability Check	04
Threat Levels	05
Found Threats	06-A/06-C
Good Practices	07

# PRAYGE

## PROJECT DESCRIPTION

### According to their website:

"Yay, Prayge is gonna be the next big thing, like Pepe and Jesus! Don't be silly, don't miss \$PRAYGE. It's the bestest of the bestest. Let's all say, "Yay, \$PRAYGE!"

We don't need fancy websites we go deep moon together folks on X please and join the telegram."

**Release Date:** Presale starts in December, 2023

**Category:** Meme token

# CONTRACT INFO

Token Name  
Prayge

Symbol  
PRAYGE

Contract Address  
0xb6d8fC1Fd566e823B917299F3BA052fA712672A

Network  
Binance Smart Chain

Language  
Solidity

Deployment Date  
Dec 06, 2023

Contract Type  
Token with taxes

Total Supply  
420,000,000,000

Status  
Not launched

## TAXES

Buy Tax  
**3%**

Sell Tax  
**3%**

\*Taxes can be changed in future

## Our Contract Review Process

The contract review process pays special attention to the following:

- ✓ Testing the smart contracts against both common and uncommon vulnerabilities
- ✓ Assessing the codebase to ensure compliance with current best practices and industry standards.
- ✓ Ensuring contract logic meets the specifications and intentions of the client.
- ✓ Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders.
- ✓ Thorough line-by-line manual review of the entire codebase by industry experts.

### Blockchain security tools used:

- OpenZeppelin
- Mythril
- Solidity Compiler
- Hardhat

# TOKEN TRANSFERS STATS

Transfer Count	1
Uniq Senders	1
Uniq Receivers	1
Total Amount	420,000,000,000 PRAYGE
Median Transfer Amount	420,000,000,000 PRAYGE
Average Transfer Amount	420,000,000,000 PRAYGE
First transfer date	2023-12-06
Last transfer date	2023-12-06
Days token transferred	1

# SMART CONTRACT STATS

Calls Count	1
External calls	1
Internal calls	0
Transactions count	1
Uniq Callers	1
Days contract called	1
Last transaction time	2023-12-06 10:41:13 UTC
Created	2023-12-06 10:41:13 UTC
Create TX	0xd75c586b6c78c06bd20c19d5f365b1cac3bd2641162fc3292d920e9c50052cac
Creator	0x0d7d5ea9054fabccdl5da4c2ffacf3778a78fd0c

# VULNERABILITY CHECK

Design Logic	Passed
Compiler warnings.	Passed
Private user data leaks	Passed
Timestamp dependence	Passed
Integer overflow and underflow	Passed
Race conditions and reentrancy. Cross-function race conditions	Passed
Possible delays in data delivery	Passed
Oracle calls	Passed
Front running	Passed
DoS with Revert	Passed
DoS with block gas limit	Passed
Methods execution permissions	Passed
Economy model	Passed
Impact of the exchange rate on the logic	Passed
Malicious Event log	Passed
Scoping and declarations	Passed
Uninitialized storage pointers	Passed
Arithmetic accuracy	Passed
Cross-function race conditions	Passed
Safe Zeppelin module	Passed
Fallback function security	Passed

# THREAT LEVELS

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time. We categorize these vulnerabilities by the following levels:

## High Risk

---

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

## Medium Risk

---

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

## Low Risk

---

Issues on this level are minor details and warning that can remain unfixed.

## Informational

---

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

# FOUND THREATS

## High Risk

No high risk-level threats found in this contract.

## Medium Risk

No medium risk-level threats found in this contract.

## Low Risk

No low risk-level threats found in this contract.

## Informational

**Owner can set buy/sell/transfer fees up to 10%.**

Combined buy+sell = 20%.

When fees are above 0, there will be certain amount of tokens that will be deducted from every transaction that users make.

Deducted amount will be as much as the fees % from total amount that user had bought, sold and/or transferred.

```
function setBuyTax(uint256 _marketingTaxBuy) external onlyOwner {
    require(
        marketingTaxBuy != _marketingTaxBuy,
        "Buy Tax already on that amount"
    );
    require(_marketingTaxBuy <= 1_000, "Buy Tax cannot be more than 10%");

    marketingTaxBuy = _marketingTaxBuy;

    emit UpdateBuyTax(_marketingTaxBuy);
}

function setSellTax(uint256 _marketingTaxSell) external onlyOwner {
    require(
        marketingTaxSell != _marketingTaxSell,
        "Sell Tax already on that amount"
    );
    require(_marketingTaxSell <= 1_000, "Sell Tax cannot be more than 10%");

    marketingTaxSell = _marketingTaxSell;

    emit UpdateSellTax(_marketingTaxSell);
}

function setTransferTax(uint256 _marketingTaxTransfer) external onlyOwner {
    require(
        marketingTaxTransfer != _marketingTaxTransfer,
        "Transfer Tax already on that amount"
    );
    require(
        _marketingTaxTransfer <= 1_000,
        "Transfer Tax cannot be more than 10%"
    );

    marketingTaxTransfer = _marketingTaxTransfer;

    emit UpdateTransferTax(_marketingTaxTransfer);
}
```

## Informational

### **Owner can exclude address from fees.**

When address is excluded from fees, the user will receive the whole amount of the bought, sold and/or transferred tokens.

```
function setExcludeFromFees(  
    address account,  
    bool excluded  
) external onlyOwner {  
    require(  
        _isExcludedFromFees[account] != excluded,  
        "Account is already the value of 'excluded'"  
    );  
    _isExcludedFromFees[account] = excluded;  
  
    emit UpdateExcludeFromFees(account, excluded);  
}
```

### **Owner can withdraw any tokens from the contract except the native PRAYAGE token.**

When this function is present, in cases tokens are sent into the contract by mistake or purposefully, contract's owner can retrieve them.

```
function claimStuckTokens(address token) external onlyOwner {  
    require(token != address(this), "Owner cannot claim native tokens");  
  
    if (token == address(0x0)) {  
        payable(msg.sender).transfer(address(this).balance);  
        return;  
    }  
    IERC20 ERC20token = IERC20(token);  
    uint256 balance = ERC20token.balanceOf(address(this));  
    ERC20token.safeTransfer(msg.sender, balance);  
}
```

RECOMMENDATIONS FOR

# GOOD PRACTICES

---

1

Consider fundamental tradeoffs

2

Be attentive to blockchain properties

3

Ensure careful rollouts

4

Keep contracts simple

5

Stay up to date and track development

## PRAYGE

### GOOD PRACTICES FOUND

- ✓ The owner cannot mint new tokens after deployment
- ✓ The owner cannot stop or pause the contract
- ✓ The owner cannot set a transaction limit

There is no information about the initial tokens distribution based on the project's whitepaper and/or website.

# TOKENOMICS

# THE TEAM

⚠ The team is anonymous

## KYC INFORMATION

### No KYC

We recommend the team to get a KYC in order to ensure trust and transparency within the community.

# WEBSITE

## Website URL

<https://www.prayge.org/>

## Domain Registry

<https://www.tucows.com>

## Domain Expiration

2024-12-06

## Technical SEO Test

Passed

## Security Test

Passed. SSL certificate present

## Design

Single page design with appropriate color scheme and graphics.

## Content

The information helps new investors understand what the product does.

No grammar mistakes found.

## Whitepaper

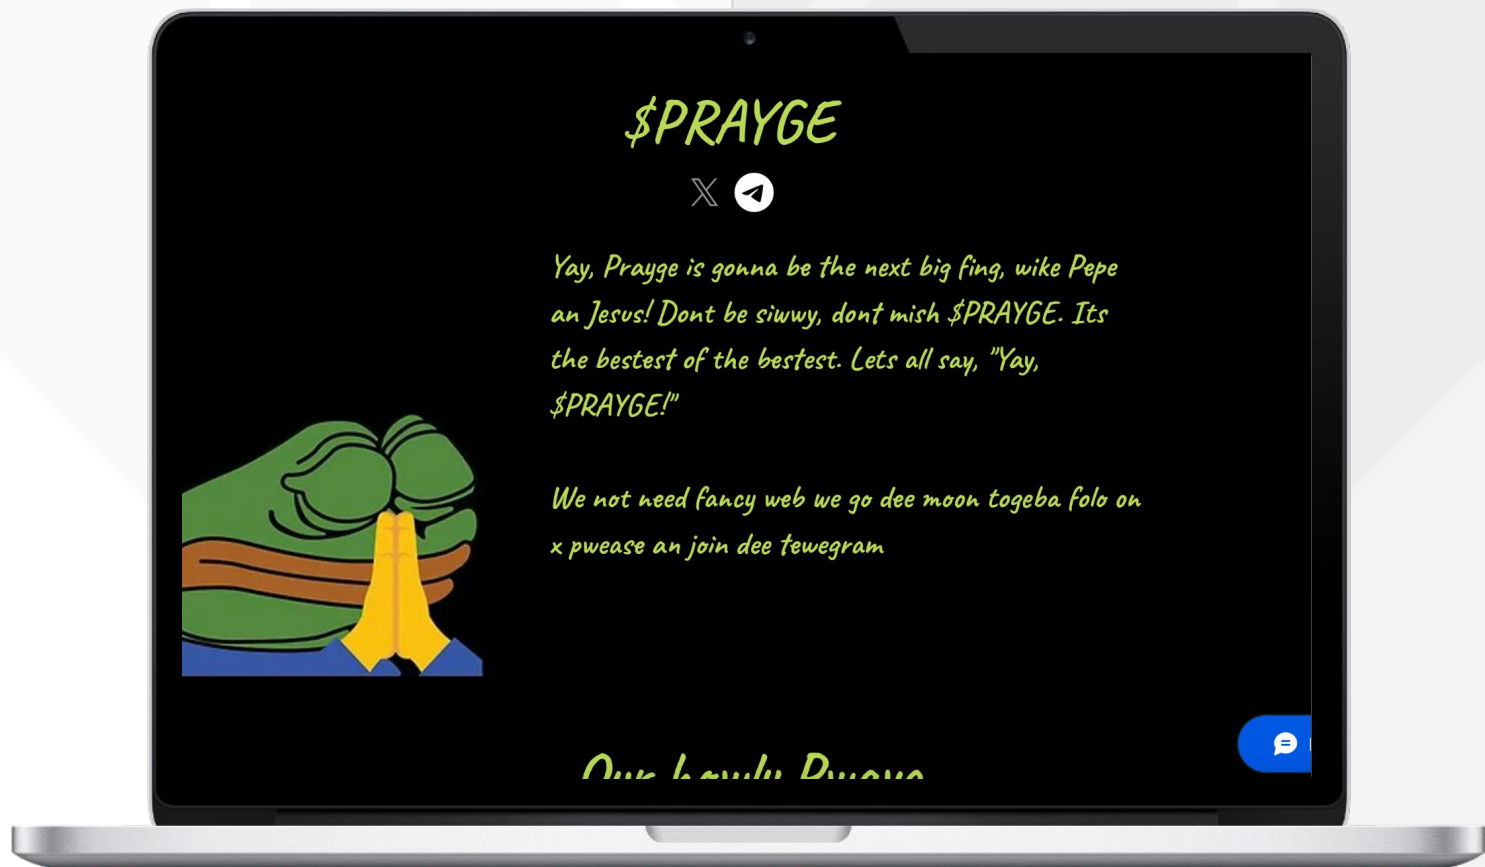

No

## Roadmap

No

## Mobile-friendly?

Yes

Contract Development

## ABOUT US

We are a growing crypto security agency offering audits, KYCs and consulting services for some of the top names in the crypto industry.

- ✓ OVER 700 SUCCESSFUL CLIENTS
- ✓ MORE THAN 1000 SCAMS EXPOSED
- ✓ MILLIONS SAVED IN POTENTIAL FRAUD
- ✓ PARTNERSHIPS WITH TOP LAUNCHPADS, INFLUENCERS AND CRYPTO PROJECTS
- ✓ CONSTANTLY BUILDING TOOLS TO HELP INVESTORS DO BETTER RESEARCH

# Disclaimer

This report shows findings based on our limited project analysis, following good industry practice from the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, overall social media and website presence and team transparency details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report.

While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

## **DISCLAIMER:**

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice.

No one shall have any right to rely on the report or its contents, and SpyWolf and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (SpyWolf) owe no duty of care towards you or any other person, nor does SpyWolf make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and SpyWolf hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, SpyWolf hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against SpyWolf, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts, website, social media and team.

No applications were reviewed for security. No product code has been reviewed.
