

SPYWOLF

Security Audit Report

Completed on
October 11, 2023

@SPYWOLFNETWORK

@SPYWOLFNETWORK

SPYWOLF.CO

OVERVIEW

This audit has been prepared for **Lamon Reboot** to review the main aspects of the project to help investors make an informative decision during their research process.

You will find a summarized review of the following key points:

- ✓ Contract's source code
- ✓ Owners' wallets
- ✓ Tokenomics
- ✓ Team transparency and goals
- ✓ Website's age, code, security and UX
- ✓ Whitepaper and roadmap
- ✓ Social media & online presence

“

The results of this audit are purely based on the team's evaluation and does not guarantee nor reflect the projects outcome and goal

- SPYWOLF Team -

”

Lamon Reboot

PROJECT DESCRIPTION

According to their website:

"Develop your lamon plantations, compete at the fair and make a profit"

Release Date: Staking starts in October, 2023

Category: Staking

CONTRACT INFO

Token Name N/A	Symbol N/A
Contract Address 0xfEA20421C1C73a451b7c0D5A4414aC14e63e0414	
Network Binance Smart Chain	Language Solidity
Deployment Date Oct 11, 2023	Contract Type Staking
Total Supply N/A	Status Not launched

TAXES

*Taxes cannot be changed

Our Contract Review Process

The contract review process pays special attention to the following:

- ✓ Testing the smart contracts against both common and uncommon vulnerabilities
- ✓ Assessing the codebase to ensure compliance with current best practices and industry standards.
- ✓ Ensuring contract logic meets the specifications and intentions of the client.
- ✓ Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders.
- ✓ Thorough line-by-line manual review of the entire codebase by industry experts.

Blockchain security tools used:

- OpenZeppelin
- Mythril
- Solidity Compiler
- Hardhat

TOKEN TRANSFERS STATS

Transfer Count	N/A
Uniq Senders	N/A
Uniq Receivers	N/A
Total Amount	N/A
Median Transfer Amount	N/A
Average Transfer Amount	N/A
First transfer date	N/A
Last transfer date	N/A
Days token transferred	N/A

SMART CONTRACT STATS

Calls Count	1
External calls	1
Internal calls	0
Transactions count	1
Uniq Callers	1
Days contract called	1
Last transaction time	Oct-11-2023 01:20:45 PM +UTC
Created	Oct-11-2023 12:07:28 PM +UTC
Create TX	0x4d56e1907079f33ce5c8fa5fa3824bb246f2bda34174ab8983d6dd99f3bflbd1
Creator	0x44488c5Ad94688450BF242d855f588ae53077b1B

VULNERABILITY CHECK

Design Logic	Passed
Compiler warnings.	Passed
Private user data leaks	Passed
Timestamp dependence	Passed
Integer overflow and underflow	Passed
Race conditions and reentrancy. Cross-function race conditions	Passed
Possible delays in data delivery	Passed
Oracle calls	Passed
Front running	Passed
DoS with Revert	Passed
DoS with block gas limit	Passed
Methods execution permissions	Passed
Economy model	Passed
Impact of the exchange rate on the logic	Passed
Malicious Event log	Passed
Scoping and declarations	Passed
Uninitialized storage pointers	Passed
Arithmetic accuracy	Passed
Cross-function race conditions	Passed
Safe Zeppelin module	Passed
Fallback function security	Passed

THREAT LEVELS

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time. We categorize these vulnerabilities by the following levels:

High Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Medium Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Low Risk

Issues on this level are minor details and warning that can remain unfixed.

Informational

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

Informational

There is 24 hours cutoff for rewards.

Example – user collects rewards after 3 days, he/she will receive rewards for 1 day (24hours).

For maximum return of investment, consider claiming your rewards at least once every 24 hours.

Maximum value per withdraw at one time can be up to user's current total investment x3.

User's overall cumulative withdraws can be more than 300% of their investment.

```
function _updateprePayment(address account) internal {
    uint256 pending = checkReward(_msgSender());
    user[account].timestamp = block.timestamp;
    user[account].lamons += pending;
    user[account].earned += pending;
}

function checkReward(address account) public view returns (uint256) {
    uint256 RewardTime = block.timestamp - user[account].timestamp;
    RewardTime = (RewardTime >= 86400) ? 86400 : RewardTime;
    uint256 reward = (((user[account].deposit / 100) * user[account].percentage) /
        10000000000) * RewardTime;
    return reward > user[_msgSender()].maxEarnings ? user[_msgSender()].maxEarnings : reward;
}

function ReinvestLamon(uint256 amount) external nonReentrant {
    require(
        _msgSender() == tx.origin,
        "Function can only be called by a user account"
    );
    uint256 fee = (amount * 30) / 1000;
    _updateprePayment(_msgSender());
    user[_msgSender()].lamons -= amount;
    user[_msgSender()].maxEarnings += amount * INIT_MAX_INCOME_MULTIPLIER;
    user[_msgSender()].totalEarnings = 0;
    user[_msgSender()].deposit += amount;
    user[_msgSender()].reinvested += amount;
    emit ChangeUser(
        _msgSender(),
        user[_msgSender()].partner,
        user[_msgSender()].deposit
    );
    user[owner()].lamons += fee;
}
```

This is **Return Of Investment (ROI)** dapp.
There is 24 hours cutoff for rewards claiming and daily ROI of 2.49%.

Users can increase their returns by with fairs.
There are 3 types of fairs which costs 5\$, 25\$ and 50\$ respectively. Two users can participate in one fair and one winner will be declared, cashing out their entry x2. Loser player will lose their entry in favor of the winner. On each fair game 5% of game's value will be sent to contract's owner.

There is referral system with 10% bonus for each newly invited user. In order to get the bonus, the one who invites new users must be already invested in the contract, otherwise referral becomes the default ref address (project owners).

Maximum value per withdraw at one time can be up to user's current total investment x3.
User's cumulative withdraw's value is unlimited.

ROI dapps can be very volatile and risky.

TOKENOMICS

THE TEAM

⚠ The team is
anonymous

KYC INFORMATION

No KYC

We recommend the team to get a KYC in order to ensure trust and transparency within the community.

WEBSITE

Website URL

ABOUT US

We are a growing crypto security agency offering audits, KYCs and consulting services for some of the top names in the crypto industry.

- ✓ OVER 500 SUCCESSFUL CLIENTS
- ✓ MORE THAN 500 SCAMS EXPOSED
- ✓ MILLIONS SAVED IN POTENTIAL FRAUD
- ✓ PARTNERSHIPS WITH TOP LAUNCHPADS, INFLUENCERS AND CRYPTO PROJECTS
- ✓ CONSTANTLY BUILDING TOOLS TO HELP INVESTORS DO BETTER RESEARCH

Disclaimer

This report shows findings based on our limited project analysis, following good industry practice from the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, overall social media and website presence and team transparency details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report.

While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

DISCLAIMER:

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice.

No one shall have any right to rely on the report or its contents, and SpyWolf and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (SpyWolf) owe no duty of care towards you or any other person, nor does SpyWolf make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and SpyWolf hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, SpyWolf hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against SpyWolf, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts, website, social media and team.

No applications were reviewed for security. No product code has been reviewed.
