

Security Audit Report

Completed on May 9, 2023

OVERVIEW

This audit has been prepared for **Muskman INU** to review the main aspects of the project to help investors make make an informative decision during their research process.

You will find a a summarized review of the following key points:

- ✓ Contract's source code
- ✓ Owners' wallets
- ✓ Tokenomics
- ✓ Team transparency and goals
- ✓ Website's age, code, security and UX
- Whitepaper and roadmap
- ✓ Social media & online presence

The results of this audit are purely based on the team's evaluation and does not guarantee nor reflect the projects outcome and goal

- SPYWOLF Team -

Muskman INU

PROJECT DESCRIPTION

According to their whitepaper:

Muskman approaches the creation of our community from a unique perspective. We believe that through the power of collective decentralization, we can build something stronger than a centralized team ever could. A community-run token is nothink without the united individuals who give it purpose. From the early days of Muskman, we will be known as the Muskman Army, both amongst ourselves and across countless other platforms.

Release Date: Presale starts in May, 2023

Category: Meme token

CONTRACT INFO

Token Name

Muskman INU

Symbol

MMAN

Contract Address

0x56f93b9bE3f657l3eC9lF48la92f9045Bb46F4FA

Network

Binance Smart Chain

Solidity

Language

Deployment Date

May 08, 2023

Verified?

Yes

Total Supply

100,000,000,000,000

Status

Not launched

TAXES

Buy Tax

1%

Sell Tax
2%

Our Contract Review Process

The contract review process pays special attention to the following:

- Testing the smart contracts against both common and uncommon vulnerabilities
- Assessing the codebase to ensure compliance with current best practices and industry standards.
- Ensuring contract logic meets the specifications and intentions of the client.
- Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders.
- Thorough line-by-line manual review of the entire codebase by industry experts.

Blockchain security tools used:

- OpenZeppelin
- Mythril
- Solidity Compiler
- Hardhat

^{*}Taxes can be changed in future

TOKEN TRANSFERS STATS

Transfer Count	2	
Uniq Senders	2	
Uniq Receivers	2	
Total Amount	15000000000000 MMAN	
Median Transfer Amount	99999999999999999999999999999999999999	
Average Transfer Amount	7500000000000 MMAN	
First transfer date	2023-05-08	
Last transfer date	2023-05-08	
Days token transferred	1	

SMART CONTRACT STATS

Calls Count	2
External calls	2
Internal calls	0
Transactions count	2
Uniq Callers	1
Days contract called	1
Last transaction time	2023-05-08 09:16:09 UTC
Created	2023-05-08 09:15:39 UTC
Create TX	0x5ede957b196783b140dff14a1cd39dcf5f213 0245c6b85fd1c56018d7b11e7de
Creator	0x15649aa701da8c1de88f009412dcdb5cf069 8947

VULNERABILITY CHECK

Design Logic	Passed
Compiler warnings.	Passed
Private user data leaks	Passed
Timestamp dependence	Passed
Integer overflow and underflow	Passed
Race conditions and reentrancy. Cross-function race conditions	Passed
Possible delays in data delivery	Passed
Oracle calls	Passed
Front running	Passed
DoS with Revert	Passed
DoS with block gas limit	Passed
Methods execution permissions	Passed
Economy model	Passed
Impact of the exchange rate on the logic	Passed
Malicious Event log	Passed
Scoping and declarations	Passed
Uninitialized storage pointers	Passed
Arithmetic accuracy	Passed
Cross-function race conditions	Passed
Safe Zeppelin module	Passed
Fallback function security	Passed

SPYWOLF.CO

THREAT LEVELS

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time. We categorize these vulnerabilities by the following levels:

High Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Medium Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Low Risk

Issues on this level are minor details and warning that can remain unfixed.

Informational

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

FOUND THREATS

High Risk

Additional tokens are minted on each tax deduction event. This might lead to token's inflation in future.

```
function takeTaxes(address from, uint256 amount, bool buy, bool sell, bool other) internal returns (uint256) {
   uint256 feeAmount = amount * currentFee / masterTaxDivisor;
   if (feeAmount > 0) {
       _tOwned[address(this)] += feeAmount;
       emit Transfer(from, address(this), feeAmount);
   uint256 generatedAmount = feeAmount;
   if (feeAmount + getCirculatingSupply() >= maximumSupply) {
       generatedAmount = maximumSupply - getCirculatingSupply();
   uint256 swapAmt = generatedAmount * swapRatio / masterTaxDivisor;
   uint256 devAmt = generatedAmount * devRatio / masterTaxDivisor;
   uint256 burnAmt = generatedAmount - (swapAmt + devAmt);
    _tTotal += generatedAmount;
   if (burnAmt > 0) {
       _tOwned[DEAD] += burnAmt;
       emit Transfer(address(0), DEAD, burnAmt);
   if (swapAmt > 0) {
       _tOwned[address(this)] += swapAmt;
       emit Transfer(address(0), address(this), swapAmt);
   if (devAmt > 0) {
       _tOwned[_taxWallets.TRUST] += devAmt;
       emit Transfer(address(0), _taxWallets.TRUST, devAmt);
   return amount - feeAmount;
```

- Recommendation:
 - Taxes should be deducted from already existing amounts, without creating additional tokens.

FOUND THREATS

Medium Risk

Owner can set protections and cashier contract once, before trading is enabled.

Owner can set anti bots criteria in the protections contract.

Cashier contract is responsible for rewards distribution.

The protections external contract is used to perform checks on regular users with each token buy/sell/transfer.

If protections contract is inappropriate one, unexcluded users from limitations won't be able to buy/sell the token.

The protections contract that perform these checks is not in the scope of the current audit.

```
function setInitializers(address aInitializer, address cInitializer) external onlyOwner {
   require(!tradingEnabled);
   require(cInitializer != address(this) && aInitializer != address(this) && cInitializer != aInitializer);
   cashier = Cashier(cInitializer);
   protections = Protections(aInitializer);
function finalizeTransfer(address from, address to, uint256 amount, bool buy, bool sell, bool other) internal returns (bool) {
   if (_hasLimits(from, to)) { bool checked;
       try protections.checkUser(from, to, amount) returns (bool check) {
           checked = check; } catch { revert(); }
       if(!checked) { revert(); }
```

Informational

Owner can withdraw any tokens from the contract until liquidity is added. Once liquidity is added, the owner can withdraw any tokens from the contract with exception of the native blockchain token (BNB) and the native contract token (MMAN).

```
function sweepContingency() external onlyOwner {
    require(!_hasLiqBeenAdded, "Cannot call after liquidity.");
    payable(_owner).transfer(address(this).balance);
}

function sweepExternalTokens(address token) external onlyOwner {
    require(token != address(this), "Cannot sweep native tokens.");
    IERC20 TOKEN = IERC20(token);
    TOKEN.transfer(_owner, TOKEN.balanceOf(address(this)));
}
```

Owner can set bonus sell tax up to 10%, for up to 10 days after user's buy.

```
function setBonusSellTaxEnalbed(bool enabled) external onlyOwner {
   bonusSellTaxEnabled = enabled;
}

function setBonusSellTaxTime(uint256 timeInSeconds) external onlyOwner {
   require(timeInSeconds <= 10 days);
   sellTaxBonusTime = timeInSeconds;
}

function getBonusSellTaxEndTime(address account) view external returns (uint256 endTime) {
   if (buyMap[account] == 0) {
      endTime = 0;
   } else {
      endTime = buyMap[account] + sellTaxBonusTime;
   }
}</pre>
```

Informational

Owner can set buy/sell fees up to 1% and bonus sell fee up to 10%. Combined buy+sell = 12%.

When fees are above 0, there will be certain amount of tokens that will be deducted from every transaction that users make. Deducted amount will be as much as the fees % from total amount that user had bought, sold and/or transferred.

Owner can exclude address from fees, max transaction and max wallet limits. Such limits won't apply on excluded addresses.

```
function setExcludedFromFees(address account, bool enabled) public onlyOwner {
    _isExcludedFromFees[account] = enabled;
}
```

RECOMMENDATIONS FOR

GOOD PRACTICES

- Consider fundamental tradeoffs
- Be attentive to blockchain properties
- 3 Ensure careful rollouts
- 4 Keep contracts simple
- Stay up to date and track development

Muskman INU GOOD PRACTICES FOUND

The owner cannot set a transaction limit

There is no information about the initial tokens distribution based on the project's whitepaper and/or website.

SPYWOLF.CO

THE

1 The team is annonymous

KYC INFORMATION

We recommend the team to get a KYC in order to ensure trust and transparency within the community.

Website URL

SPYWOLF CRYPTO SECURITY

Audits | KYCs | dApps Contract Development

ABOUT US

We are a growing crypto security agency offering audits, KYCs and consulting services for some of the top names in the crypto industry.

- ✓ OVER 500 SUCCESSFUL CLIENTS
- ✓ MORE THAN 500 SCAMS EXPOSED
- ✓ MILLIONS SAVED IN POTENTIAL FRAUD
- ✓ PARTNERSHIPS WITH TOP LAUNCHPADS,
 INFLUENCERS AND CRYPTO PROJECTS
- ✓ CONSTANTLY BUILDING TOOLS TO HELP INVESTORS DO BETTER RESEARCH

Disclaimer

This report shows findings based on our limited project analysis, following good industry practice from the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, overall social media and website presence and team transparency details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report.

While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

DISCLAIMER:

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice.

No one shall have any right to rely on the report or its contents, and SpyWolf and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (SpyWolf) owe no duty of care towards you or any other person, nor does SpyWolf make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and SpyWolf hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, SpyWolf hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against SpyWolf, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts, website, social media and team.

No applications were reviewed for security. No product code has been reviewed.
