

SPYWOLF

Security Audit Report

Audit prepared for

Monstro's Degenz

Completed on

December 19, 2023

OVERVIEW

This goal of this report is to review the main aspects of the project to help investors make an informative decision during their research process.

You will find a a summarized review of the following key points:

- ✓ Contract's source code
- ✓ Owners' wallets
- ✓ Tokenomics
- ✓ Team transparency and goals
- ✓ Website's age, code, security and UX
- ✓ Whitepaper and roadmap
- ✓ Social media & online presence

The results of this audit are purely based on the team's evaluation and does not guarantee nor reflect the projects outcome and goal

- SPYWOLF Team -

Monstro's Degenz

PROJECT DESCRIPTION

According to their whitepaper:

"Are you a DeFi enthusiast who loves the allure of profitable ROI dApps but hates enduring endless losses? Look no further than Monstro's Degenz! Unleash your inner degen amongst the safety of your fellow monsters."

Release Date: December 27th, 2023

Category: ROI dApp, Farming

T

CONTRACT INFO

Token Name

MonstroDegenzS1

Symbol

N/A

Contract Address

0xCc57F57e82D8A96Ef488D150f5A7fB11882d1176

Network

Binance Smart Chain

Contract Type

Language

Solidity

Dec 18, 2023

Deployment Date

Staking

Total Supply

N/A

Status

Launched

TAXES

Buy Tax ***30%** Sell Tax

5%

*Distribution of buy tax according to the project's team: Farmz working capital, which benefits the user as it is their "safety net" passive income for when the "ROI dApp" phase runs dry

For more information check their documents page: https://wiki.monstro.fun/universe/

Our Contract Review Process

The contract review process pays special attention to the following:

- Testing the smart contracts against both common and uncommon vulnerabilities
- Assessing the codebase to ensure compliance with current best practices and industry standards.
- Ensuring contract logic meets the specifications and intentions of the client.
- Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders.
- Thorough line-by-line manual review of the entire codebase by industry experts.

Blockchain security tools used:

- OpenZeppelin
- Mythril
- Solidity Compiler
- Hardhat

TOKEN TRANSFERS STATS

VULNERABILITY CHECK

Design Logic	Passed
Compiler warnings.	Passed
Private user data leaks	Passed
Timestamp dependence	Passed
Integer overflow and underflow	Passed
Race conditions and reentrancy. Cross-function race conditions	Passed
Possible delays in data delivery	Passed
Oracle calls	Passed
Front running	Passed
DoS with Revert	Passed
DoS with block gas limit	Passed
Methods execution permissions	Passed
Economy model	Passed
Impact of the exchange rate on the logic	Passed
Malicious Event log	Passed
Scoping and declarations	Passed
Uninitialized storage pointers	Passed
Arithmetic accuracy	Passed
Cross-function race conditions	Passed
Safe Zeppelin module	Passed
Fallback function security	Passed

THREAT LEVELS

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time. We categorize these vulnerabilities by the following levels:

High Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Medium Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Low Risk

Issues on this level are minor details and warning that can remain unfixed.

Informational

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

FOUND THREATS

High Risk

No high risk-level threats found in this contract.

Medium Risk

No medium risk-level threats found in this contract.

Low Risk

No low risk-level threats found in this contract.

Informational

Owner can stop new deposits and reinvestments, but cannot stop rewards claiming.

```
function toggleDepositsAndReinvests() public onlyOwner {
    depositsAndReinvestsPaused = !depositsAndReinvestsPaused;
    emit DepositsAndReinvestsToggled(depositsAndReinvestsPaused);
}
```

Users can set cashback percent for their referrals up to 100%.

```
function setCashbackPercent(uint256 percent) public {
   require(percent >= 0 && percent <= 100, "Cashback percentage must be between 0% and 100%");
   walletData[msg.sender].cashbackPercent = percent;

emit CashbackPercentSet(msg.sender, percent);
}</pre>
```

Informational

NFT boost check data is taken from external contract which is **not** part of the current audit. NFT boost can be up to 2%.

```
uint256 public constant MAX_BONUS_NFT = 200;
   nftBoosts.push(NFTBoost(25, "partner"));
   nftBoosts.push(NFTBoost(25, "lazarusPit"));
   nftBoosts.push(NFTBoost(25, "monstroFarmz"));
  nftBoosts.push(NFTBoost(50, "monstroCastle"));
  nftBoosts.push(NFTBoost(75, "monstroMonstro"));
   nftBoosts.push(NFTBoost(100, "monstroVault"));
   nftBoosts.push(NFTBoost(150, "monstroKingdom"));
function calculateNFTBoost(address wallet) public view returns (uint256) {
   uint256 boost = 0;
   for (uint i = 0; i < nftBoosts.length; i++) {
       uint256 boostAmount = 0;
       boostAmount = contractChecker.executeDataCheck(nftBoosts[i].functionName, wallet);
       if (boostAmount > 0) {
           boost += nftBoosts[i].boost;
   if (boost > MAX_BONUS_NFT) {
       boost = MAX_BONUS_NFT;
   return boost;
```

RECOMMENDATIONS FOR

GOOD PRACTICES

- Consider fundamental tradeoffs
- Be attentive to blockchain properties
- 3 Ensure careful rollouts
- 4 Keep contracts simple
- Stay up to date and track development

Monstro's Degenz GOOD PRACTICES FOUND

The owner cannot set a transaction limit

07

This is a ROI dApp offering daily ROI of 2% to 6%. Users can increase their daily ROI through NFT and Personal "boosts". Base rate is 2%, NFT bonuses up to 2% and deposit value bonuses up to 2% allow for a total of 6% daily ROI.

Deposited funds are allocated as follows:

50% - Liquidity

30% - Farmz! working capital (on user's behalf)

20% - Referrals & Marketing

Claims are subject to a 5% tax:

4% - Team

1% - Genesis NFT holders

There is an aggressive referral program with rewards ranging from 5% - 20% based on total referred volume. Affiliates may also set a cashback % (up to 100%) to share rewards with their referrals. All rewards are paid out instantly in BNB.

"No Lose" Guarantee
Given ROI dApps are typically volatile and considered
high-risk, Degenz! differentiates itself by offering a
"safety net" in the form of weekly passive income
through yield farming. Working capital for farming is
collected on every deposit and reinvestment.

*ROI - Return of investment

ROI dapps are usually subject to high volatility and considered as high risk investments.

Disclaimer

This report shows findings based on our limited project analysis, following good industry practice from the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, overall social media and website presence and team transparency details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report.

While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

DISCLAIMER:

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice.

No one shall have any right to rely on the report or its contents, and SpyWolf and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (SpyWolf) owe no duty of care towards you or any other person, nor does SpyWolf make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and SpyWolf hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, SpyWolf hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against SpyWolf, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts, website, social media and team.

No applications were reviewed for security. No product code has been reviewed.
