

SPYWOLF

Security Audit Report

Completed on

December 3, 2022

OVERVIEW

This audit has been prepared for **Ryz3 - Messi** to review the main aspects of the project to help investors make make an informative decision during their research process.

You will find a a summarized review of the following key points:

- ✓ Contract's source code
- ✓ Owners' wallets
- ✓ Tokenomics
- Team transparency and goals
- ✓ Website's age, code, security and UX
- ✓ Whitepaper and roadmap
- ✓ Social media & online presence

The results of this audit are purely based on the team's evaluation and does not guarantee nor reflect the projects outcome and goal

- SPYWOLF Team -

R/Z3

PROJECT DESCRIPTION

According to their website:

The first Binary Tokens powering web3 speculation – think online betting merged with defi investing.

"Messi v Ronaldo: Top Goal Scorer" is the first official Ryz3 event – an alpha launch of the first Binary Tokens. Players can participate by purchasing either the Messi or Ronaldo token from PancakeSwap. A percentage of all transactions will be added to a prize pool that gets distributed as BUSD to the holders of the current winning token, that is the current Top Goal Scorer + Assists in the 2022 FIFA World Cup between Lionel Messi and Cristiano Ronaldo. At regular intervals, the leader is determined externally by a data feed provider.In Layman's terms, if you're holding Messi token, and Messi is currently leading the goals and assists, then you earn bonus BUSD just for holding!

Release Date: Presale starts in December 3, 2022

Category: Betting

CONTRACT INFO

Token Name

Ryz3 Messi

Symbol

RZMESSI

Contract Address

0x3bc84253CD67fbe7b9ffD1F7b7185A39B38DD445

Network

Binance Smart Chain

Language

Solidity

Deployment Date

Dec 03, 2022

Verified?

Yes

Total Supply

1,000,000,000

Status

Not launched

TAXES

Buy Tax

4%

Sell Tax
12%

Our Contract Review Process

The contract review process pays special attention to the following:

- Testing the smart contracts against both common and uncommon vulnerabilities
- Assessing the codebase to ensure compliance with current best practices and industry standards.
- Ensuring contract logic meets the specifications and intentions of the client.
- Cross referencing contract structure and implementation against similar smart contracts produced by industry leaders.
- Thorough line-by-line manual review of the entire codebase by industry experts.

Blockchain security tools used:

- OpenZeppelin
- Mythril
- Solidity Compiler
- Hardhat

^{*}Taxes can be changed in future

05

VULNERABILITY CHECK

Design Logic	Passed
Compiler warnings.	Passed
Private user data leaks	Passed
Timestamp dependence	Passed
Integer overflow and underflow	Passed
Race conditions and reentrancy. Cross-function race conditions	Passed
Possible delays in data delivery	Passed
Oracle calls	Passed
Front running	Passed
DoS with Revert	Passed
DoS with block gas limit	Passed
Methods execution permissions	Passed
Economy model	Passed
Impact of the exchange rate on the logic	Passed
Malicious Event log	Passed
Scoping and declarations	Passed
Uninitialized storage pointers	Passed
Arithmetic accuracy	Passed
Cross-function race conditions	Passed
Safe Zeppelin module	Passed
Fallback function security	Passed

THREAT LEVELS

When performing smart contract audits, our specialists look for known vulnerabilities as well as logical and access control issues within the code. The exploitation of these issues by malicious actors may cause serious financial damage to projects that failed to get an audit in time. We categorize these vulnerabilities by the following levels:

High Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Medium Risk

Issues on this level are critical to the smart contract's performance/functionality and should be fixed before moving to a live environment.

Low Risk

Issues on this level are minor details and warning that can remain unfixed.

Informational

Information level is to offer suggestions for improvement of efficacy or security for features with a risk free factor.

FOUND THREATS

Medium Risk

Owner can set buy/sell fees up to 25%. Combined buy+sell=50%.

```
function setAllBuyFees (
   uint256 allReward,
   uint256 allmarketingDev,
   uint256 allLiquidity,
   uint256 allCommunity,
   uint256 allBurn
) public onlyOwner {
   buyTotalFees = allReward.add(allmarketingDev).add(allLiquidity).add(allCommunity).add(allBurn);
   require(buyTotalFees <= 25, "Total Fee must be less than 25%");</pre>
   binaryA.updateBuyFees(allReward, allmarketingDev, allLiquidity, allCommunity, allBurn);
    binaryB.updateBuyFees(allReward, allmarketingDev, allLiquidity, allCommunity, allBurn);
function setAllSellFees (
   uint256 allReward,
   uint256 allmarketingDev,
   uint256 allLiquidity,
   uint256 allCommunity,
   uint256 allBurn
) public onlyOwner {
   sellTotalFees = allReward.add(allmarketingDev).add(allLiquidity).add(allCommunity).add(allBurn);
    require(sellTotalFees <= 25, "Total Fee must be less than 25%");
   binaryA.updateSellFees(allReward, allmarketingDev, allLiquidity, allCommunity, allBurn);
    binaryB.updateSellFees(allReward, allmarketingDev, allLiquidity, allCommunity, allBurn);
```

- Recommendation:
 - Considered as good tax deduction practice is buy and sell fees combined not to exceed 25%.

Informational

Owner can withdraw thee rewards accumulated in dividend distributor contract.

```
function purgeBeforeSwitch() public onlyParentOwner {
    dividendDistributorSelf.purge(msg.sender);
}

function purge(address receiver) external override onlyControllerOrToken {
    uint256 balance = REWARD.balanceOf(address(this));
    REWARD.transfer(receiver, balance);
}
```

Owner can set score controller.

Score controler can change scores for each binary token contract.

```
function setScoreController(address controller) public onlyOwner {
    _scoreController = controller;
    emit ScoreControllerUpdated(controller);
}

function updateScores(uint256 scoreA, uint256 scoreB) public onlyScoreController {
    require(scoreA >= 0 && scoreB >= 0);
    binaryA_Score = scoreA;
    binaryB_Score = scoreB;
    emit ScoresChanged(scoreA, scoreB);
}
```

Informational

Owner can exclude address from fees and dividends.

```
function setIsDividendExemptForAll(address holder, bool exempt) public onlyOwner {
   binaryA.setIsDividendExempt(holder, exempt);
   binaryB.setIsDividendExempt(holder, exempt);
function setIsFeeExemptForAll(address holder, bool exempt) public onlyOwner {
   binaryA.setIsFeeExempt(holder, exempt);
   binaryB.setIsFeeExempt(holder, exempt);
function setIsDividendExempt(address holder, bool exempt)
   external
   onlyParentOwner
   require(holder != address(this) && holder != pair);
   isDividendExempt[holder] = exempt;
   if (exempt) {
       dividendDistributorSelf.setShare(holder, 0);
       dividendDistributorSelf.setShare(holder, _balances[holder]);
function setIsFeeExempt(address holder, bool exempt) external onlyParentOwner {
   isFeeExempt[holder] = exempt;
```

Informational

Owner can set rewards distribution criteria (period and min rewards to be distributed).

Owner can withdraw bnb from the contract.

```
function clearStuckBalance(uint256 amountPercentage) external onlyParentOwner {
    uint256 amountBNB = address(this).balance;
    payable(msg.sender).transfer((amountBNB * amountPercentage) / 100);
}
```

Owner can change the reward token.

```
function changeSwapToken(address token) external onlyParentOwner {
    SWAPTOKEN = token;
}
```

RECOMMENDATIONS FOR

GOOD PRACTICES

- Consider fundamental tradeoffs
- Be attentive to blockchain properties
- 3 Ensure careful rollouts
- 4 Keep contracts simple
- Stay up to date and track development

Ryz3 Messi GOOD PRACTICES FOUND

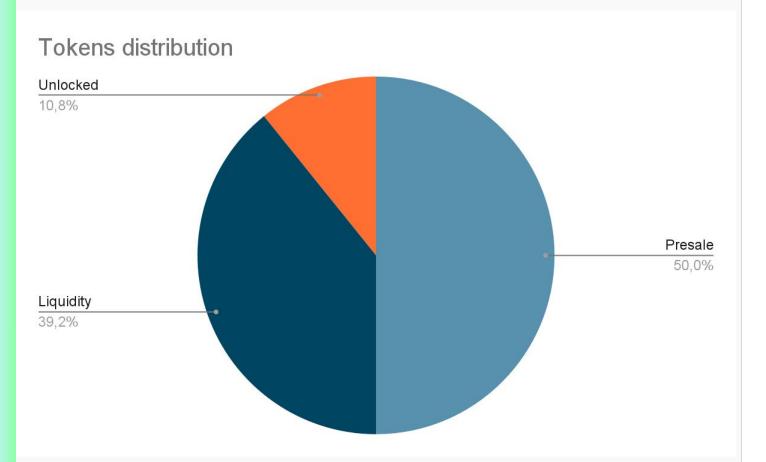

- The owner cannot mint new tokens after deployment
- The owner cannot set a transaction limit
- The smart contract utilizes "SafeMath" to prevent overflows

09

Initial tokens distribution according to Pinksale's presale page:

- 50% Presale
- 10.8% Unlocked
- 39.2% Liquidity

Disclaimer

This report shows findings based on our limited project analysis, following good industry practice from the date of this report, in relation to cybersecurity vulnerabilities and issues in the framework and algorithms based on smart contracts, overall social media and website presence and team transparency details of which are set out in this report. In order to get a full view of our analysis, it is crucial for you to read the full report.

While we have done our best in conducting our analysis and producing this report, it is important to note that you should not rely on this report and cannot claim against us on the basis of what it says or doesn't say, or how we produced it, and it is important for you to conduct your own independent investigations before making any decisions. We go into more detail on this in the disclaimer below – please make sure to read it in full.

DISCLAIMER:

By reading this report or any part of it, you agree to the terms of this disclaimer. If you do not agree to the terms, then please immediately cease reading this report, and delete and destroy any and all copies of this report downloaded and/or printed by you. This report is provided for information purposes only and on a non-reliance basis, and does not constitute investment advice.

No one shall have any right to rely on the report or its contents, and SpyWolf and its affiliates (including holding companies, shareholders, subsidiaries, employees, directors, officers and other representatives) (SpyWolf) owe no duty of care towards you or any other person, nor does SpyWolf make any warranty or representation to any person on the accuracy or completeness of the report.

The report is provided "as is", without any conditions, warranties or other terms of any kind except as set out in this disclaimer, and SpyWolf hereby excludes all representations, warranties, conditions and other terms (including, without limitation, the warranties implied by law of satisfactory quality, fitness for purpose and the use of reasonable care and skill) which, but for this clause, might have effect in relation to the report. Except and only to the extent that it is prohibited by law, SpyWolf hereby excludes all liability and responsibility, and neither you nor any other person shall have any claim against SpyWolf, for any amount or kind of loss or damage that may result to you or any other person (including without limitation, any direct, indirect, special, punitive, consequential or pure economic loss or damages, or any loss of income, profits, goodwill, data, contracts, use of money, or business interruption, and whether in delict, tort (including without limitation negligence), contract, breach of statutory duty, misrepresentation (whether innocent or negligent) or otherwise under any claim of any nature whatsoever in any jurisdiction) in any way arising from or connected with this report and the use, inability to use or the results of use of this report, and any reliance on this report. The analysis of the security is purely based on the smart contracts, website, social media and team.

No applications were reviewed for security. No product code has been reviewed.
